Making Sense of Public Opinion Claudia Strauss, 2012-10-15 Questions about immigration and social welfare programs raise the central issues of who belongs to a society and what its members deserve Yet the opinions of the American public about these important issues seem contradictory and confused Claudia Strauss explains why public opinion on these issues and many others is formed not from liberal or conservative ideologies but from diverse vernacular discourses that may not fit standard ideologies but are easy to remember and repeat Drawing on interviews with people from various backgrounds Strauss identifies and describes 59 conventional discourses about immigration and social welfare and demonstrates how we acquire conventional discourses from our opinion communities *Making Sense of Public Opinion American Discourses about Immigration and Social Programs* explains what conventional discourses are how to study them and why they are fundamental elements of public opinion and political culture

Government Ideology, Economic Pressure, and Risk Privatization Alexander Horn, 2025-10-01 From the 1980s on a privatization of labor market related risks has occurred in the OECD Governments have cut the generosity of social programs and tightened eligibility rules particularly for the unemployed *Government Ideology Economic Pressure and Risk Privatization How Economic Worldviews Shape Social Policy Choices in Times of Crisis* analyses these curtailments for eighteen countries over the course of four decades and provides an encompassing comparative assessment of the interactive impact of government ideology and economic pressure It demonstrates that the economic worldviews of governments are the most important factor in explaining why cuts are implemented or not While ideas of non intervention in the market underlie cuts in generosity ideas of equality and fairness are at the heart of stricter eligibility criteria This book also shows that the impact of the economic pressures often held responsible for the marginalization of politics and government ideology is in fact conditional on the specific ideological configuration

Lipovská, 2020-04-15 This book examines secessionism separatism and calls for independence in the European Union in recent history and within an economic context It contributes to the deeper understanding of factors influencing the individual decision making processes around secession using economic analysis to answer a set of simple questions about who the secessionists are what they really want what their incentives are and why it is easier to declare their secessionist tendencies than to vote for secession This a highly topical theme given the secessionist referenda in Catalonia Scotland Ukraine Kosovo and the United Kingdom and this book offers a unique contribution to the debate It is based on an exclusive survey carried out among members of the pro independence parties and movements across 17 European countries and 56 European regions It uses the instruments of the Political Economy of Conflict to reveal the importance of romantic and economic factors influencing the drive towards secession Secessions have been regarded as a purely romantic phenomenon that cannot be rationalised whereas this book connects the sensibility of romantic factors such as language religion or ethnicity with the sense of economic factors through its rational economic approach Furthermore it applies the standard methodology of microeconomic analysis to discover the impact of individual pro secessionist factors An integral part of the text presents a brief historic overview uncovering the lesser known path dependency The book will find an audience among researchers scholars and students of economics and political science as well as policy makers and professionals engaged with a secessionist agenda Military Review, 2010-07 *Urban Regeneration in the UK* Andrew Tallon, 2013-06-07 Striking transformations are taking place in the urban landscape The regeneration of urban areas in the UK and around the world has
