The Rise of Mass Advertising is a first cultural legal history of advertising in Britain tracing the rise of mass advertising c 1840 1914 and its legal shaping The emergence of this new system disrupted the perceived foundations of modernity The idea that culture was organized by identifiable fields of knowledge experience and authority came under strain as advertisers claimed to share values with the era s most prominent fields including news art science and religiously inflected morality While cultural boundaries grew blurry the assumption that the world was becoming progressively disenchanted was undermined as enchanted experiences multiplied with the transformation of everyday environments by advertising Magical thinking a dwelling in mysteries searches for transfiguration affective connection between humans and things and powerful fantasy disrupted assumptions that the capitalist economy was a victory of reason *The Rise of Mass Advertising* examines how contemporaries came to terms with the disruptive impact by mobilizing legal processes powers and concepts Law was implicated in performing boundary work that preserved the modern sense of field distinctions Advertising s cultural meanings and its organization were shaped dialectically vis vis other fields in a process that mainstreamed and legitimized it with legal means but also construed it as an inferior simulation of the values of a progressive modernity exhibiting epistemological shortfalls and aesthetic compromises that marked it apart from adjacent fields The dual treatment meanwhile disavowed the central role of enchantment in what amounted to a normative enterprise of disenchantment One of the ironies of this enterprise was that it ultimately drove professional advertisers to embrace enchantment as their peculiar expertise The analysis draws on an extensive archive that bridges disciplinary divides It offers a novel methodological approach to the study of advertising which brings together the history of capitalism the history of knowledge and the history of modern disenchantment and yields a new account of advertising s significance for modernity
