These services are home delivery of Pizza within 30 minutes, transportation service of office picking all employees or school children, Milkman delivering milk door-to-door and postal/courier services. In such services, service delivery and timely service are very important. These issues mainly require scheduling and routing of service vehicles.

- Tactical problems are concerned with routes that have to be scheduled on a weekly or a daily basis.
- Interactive basis allows the scheduler to use the computer to derive the most effective routes. Actual demand data are used rather than historical demand, and these 'real-time' data provide
