Inspiring Mathematics: Lessons from the Navajo Nation Math Circles Dave Auckly, Bob Klein, Amanda Serenevy, Tatiana Shubin, 2019-12-05 The people of the Navajo Nation know mathematics education for their children is essential They were joined by mathematicians familiar with ways to deliver problems and a pedagogy that through exploration shows the art joy and beauty in mathematics This combined effort produced a series of Navajo Math Circles interactive mathematical explorations across the Navajo Reservation This book contains the mathematical details of that effort Between its covers is a thematic rainbow of problem sets that were used in Math Circle sessions on the Reservation The problem sets are good for puzzling over and exploring the mathematical ideas within They will help nurture curiosity and confidence in students The problems come with suggestions for pacing for adjusting the problems to be more or less challenging and for different approaches to solving them This book is a wonderful resource for any teacher wanting to enrich the mathematical lives of students and for anyone curious about mathematical thinking outside the box In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession **CLASSICAL MECHANICS** RAO, K. SANKARA, 2005-01-01 The knowledge of classical mechanics is vital for understanding advanced technologies in several areas such as automation industrial process control and aerospace The present text is an outcome of the author s long experience in teaching this subject to postgraduate students and his work as a scientist in the area of satellite rocket motion at Vikram Sarabhai Space Centre The basic concepts and principles of mechanics are explained in clear simple terms and illustrated through several examples Keeping student accessibility in mind the book is written in an expository manner aimed at conveying a deep and coherent understanding of the dynamics of a system of particles kinematics of a rigid body motion dynamics of a rigid body in space and orbital motion This is followed by the description of Lagrange and Hamilton methods and the special theory of relativity New topics such as rocket dynamics along with vehicle optimization and three body and n body problems are also presented for the benefit of those students who wish to pursue advanced study in celestial space mechanics Solved examples and exercises reinforce conceptual understanding and highlight application of principles to real world problems Multiple choice questions are modelled on examination pattern of various Indian universities GATE and other competitive examinations The book is well suited for postgraduate students of mathematics physics and engineering particularly those studying aerospace

civil and mechanical engineering Scientists and engineers engaged in the design of multi stage rockets and study of orbits of satellites would also find the book a useful compact source of reference **Resources in Education** ,2000 **The Publisher** ,1908 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1908
