Legal Priorities in Air Transport
 Ruwantissa Abeyratne, 2019-05-27

Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance, both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO, such as the need to teach air law to a new generation of aviation professionals, combating cyber crime and cyber terrorism, the regulation of artificial intelligence, traveller identification, interference with air navigation, human trafficking, unruly passengers, climate change, air carrier liability for passenger death or injury, Remotely Piloted Aircraft Systems, drones and the cabin crew and their legal implications.

International and EU Aviation Law
 Elmar Maria Giemulla, Ludwig Weber, 2011-01-01

This book offers an extraordinary wealth of information from the ground up of the law governing and regulating air transport today, with a strong emphasis on international aviation. A team of distinguished authors in the field of aviation law provide a cogent synthesis from which sound legal opinions and strategies of legal action may be confidently built. Among the many topics here, in depth, are the following: definition and classification of airspace; distinction between civil and state aircraft; air navigation and air traffic control services; airport charges and overflight charges; structure of ICAO; standard setting functions and audit functions of ICAO; functions of the International Air Transport Association (IATA); policy and effects of deregulation and liberalization of air transport; policy of the International Registry for Aircraft Equipment; air carrier liability regimes and claims procedure; measures to combat aviation terrorism, air piracy and sabotage; and the Open Skies Agreements. This publication cites significant legislation and court rulings, including from the United States and the European Union, where far-reaching measures on market access, competition and passenger rights have set trends for other regions of the world. The special case of Latin America has a chapter to itself. At a time when commercial aircraft have been used as lethal weapons for the first time, aviation law finds itself in the front line of

responsibility for maintaining global aviation security

Border Management in Transformation Johann Wagner,2020-11-26

This book looks into the processes of change and renewal of border control and border security and management during the past 30 years after the fall of the Iron Curtain and the immense challenges in nation building in South Eastern Europe after the collapse of former Yugoslavia in relation to strategic security management The abolition of border controls within the Schengen area and simultaneous introduction of necessary replacement measures was an additional topic The book provides an insight into which the European Union is competent in the reform and modernisation of state law enforcement agencies for ensuring effective border control border surveillance and border management in line with the EU *acquis communautaire* and EU standards In the 21st century along with the process of globalisation a constantly evolving security environment creates new dimensions of threats and challenges to security and stability of transnational nature This seeks for comprehensive multidimensional collective and well coordinated responses The European Union Organization for Security and Co operation in Europe United Nations as well as other international organisations are able to really contribute to developing cooperative and coordinated responses to these threats by relying on its broad membership and profound expertise and experience According to the position of the European Union a modern cost benefit oriented and effective border management system should ensure both open borders as well as maximum of security at the same time Thus the Union's endeavour is to safeguarding internal security to all member states through preventing transnational threats combating irregular migration and any forms of cross border crime for ensuring smooth border crossings for legitimate travellers and their belongings

goods and services That is why the Union's concept of Integrated Border Management has been developed to ensure effective border control and surveillance and cost efficient management of the external borders of the European Union The Union's policy is and will continue to be developed on the basis of the three main areas in place common legislation close operational tactical cooperation and financial solidarity In addition Integrated Border Management has been confirmed as a priority area for strengthening the cooperation with third countries in the European Commission's strategic security management approach where non EU countries are encouraged as partners to upgrade their border security surveillance and border management systems Air Defence Identification Zones and Maritime Frontier Disputes Stephanie

Stipsits,2025-04-03 The book clarifies key conceptual issues surrounding ADIZs and their influence on maritime territorial disputes in the context of the Senkaku Diaoyu island dispute It uniquely offers a detailed analysis of national legislation on ADIZ suggesting that ADIZ might be evolving customary international law The book demonstrates that aerial zones do not necessarily violate the freedom of overflight as the airspace above the EEZ may have a dual legal status allowing for sui generis zones Furthermore it shows that ADIZs do not conflict with fundamental principles of international air law or the ICAO Council's authority to establish rules in international airspace *Aerial Piracy and Aviation Security* Eugene

Sochor,Yonah Alexander,2025-02-03 **Law and Regulation of Air Cargo** Ruwantissa Abeyratne,2018-07-23 This book explores the legal and regulatory aspects of the complex air cargo sector discussing in detail the general principles of the carriage of air cargo artificial intelligence and air cargo facilitation carriage of hazardous goods human remains and animals as well as cargo security price fixing and anti competitive conduct in air cargo operations liability issues the air cargo supply chain and contract of carriage It also discusses related achievements of the International Civil Aviation Organization the International Air Transport Association and Airports Council International The value of goods carried by airlines represents 74% of the global Gross Domestic Product While cargo carried by air accounts for less than 1% of global cargo carriage airlines carry 35% of the value of world trade making this industry highly valuable and efficient and the most reliable way to transport goods throughout the world On average airlines transport 52 million metric tons of goods per annum worth an equivalent of 6.8 trillion i.e. 18.6 billion worth of goods daily *The Transnational Dimension of Cyber Crime and Terrorism* Seymour E. Goodman,Abraham D. Sofaer,2013-11-01 In December 1999 more than forty members of government industry and academia assembled at the Hoover Institution to discuss this problem and explore possible countermeasures The Transnational Dimension of Cyber Crime and Terrorism summarizes the conference papers and exchanges addressing pertinent issues in chapters that include a review of the legal initiatives undertaken around the world to combat cyber crime an exploration of the threat to civil aviation analysis of the constitutional legal economic and ethical constraints on use of technology to control cyber crime a discussion of the ways we can achieve security objectives through international cooperation and more Much has been said about the threat posed by worldwide cyber crime but little has been done to

protect against it A transnational response sufficient to meet this challenge is an immediate and compelling necessity and this book is a critical first step in that direction Mapping Transatlantic Security Relations Mark B. Salter, 2010-04-15 This book examines how legal political and rights discourses security policies and practices migrate and translate across the North Atlantic The complex relationship between liberty and security has been fundamentally recast and contested in liberal democracies since the start of the global war on terror In addition to recognizing new agencies political pressures and new sensitivities to difference it is important that not to over state the novelty of the post 9 11 era the war on terror simply made possible the intensification expansion or strengthening of policies already in existence or simply enabled the shutting down of debate Working from a common theoretical frame if different disciplines these chapters present policy oriented analyses of the actual practices of security policing and law in the European Union and Canada They focus on questions of risk and exception state sovereignty and governance liberty and rights law and transparency policing and security In particular the essays are concerned with charting how policies practices and ideas migrate between Canada the EU and its member states By taking field approach to the study of security practices the volume is not constrained by national case study or the solipsistic debates within subfields and bridges legal political and sociological analysis It will be of much interest to students of critical security studies sociology law global governance and IR in general Mark B Salter is Associate Professor at the School of Political Studies University of Ottawa
