Climate Change and Local, Regional and Devolved Government Great Britain: Parliament: House of Commons: Environmental Audit Committee,2008 This report entitled Climate change and local regional and devolved government HCP 225 session 2007 08 ISBN 9780215522122 sets out 22 conclusions and recommendations including that Central Government has a duty to co ordinate how different spheres of government interact and integrate in regard of action on climate change overcoming barriers to progress on climate change is essential and the Government must look at incentives and encouragements it can offer to local regional and devolved government all local authorities should be obliged to include climate change indicators in their Local Area Agreements and further the investrment and development plans for local authorities should consider the need to reduce emissions and adapt to climate change that local authorities regional and devolved governments need to be aware of other targets including biodiversity and energy efficiency that the Government needs to consider what part carbon impact assessments will play in local regional and devolved governments and how they can become a central role in decision and policy making **Captured Futures** Maarten A. Hajer,Jeroen Oomen,2025-05-14 Environmental politics as we know it cannot deliver Despite all efforts politics is unable to bend the ecological trends Maarten A Hajer and Jeroen Oomen argue that this is because environmental politics is captured This capture doesn t just express itself in lobbying or a lack of political will but in a capture of the imagination we seem unable to imagine futures that are meaningfully different from the present Examining environmental politics as drama reveals how all actors play their particular roles in this capture scientists funnel narrow policy futures through their models activists adopt politically expedient language and policymakers look for safe technologically sound win win solutions All are captured in a regime of ecological modernization that entertains too narrow a solution space For Hajer and Oomen this is cause for concern we have entered a radical age in which persistent policy failure leads to increased suggestions to engage with speculative geoengineering technologies in a desperate attempt to safeguard the future On the other hand they point at the growing societal backlash against environmental policies Yet in the third part of the book discourse and dramaturgical analysis

appear as a reason for hope sketching an alternative perspective on environmental politics It suggests that a new more cultural approach to environmental politics could have more leverage on the societal imagination Combining this with the formulation of new discourses and using alternative dramaturgies of change Captured Futures highlights how to find more effective and more inspiring ideas about how to approach the future and ultimately liberate environmental politics
