Welter, 2025-11-18 The first English language volume to explore the work of architect Leopold Fischer and the inaugural study of his California legacy In 1936 Leopold Fischer 1901-1975 in exile from Nazi Germany arrived in California where he created a small but distinct oeuvre of mostly domestic architecture In contrast to his famous peers Rudolph Schindler and Richard Neutra immigrants whose Southern California buildings are frequently examined and who like Fischer studied with the modernist architect Adolf Loos Fischer and his California structures have until now escaped the attention of architectural history Exiled in L A examines Fischer's important yet overlooked contributions to Southern California architecture As the whereabouts of Fischer's archives remain unknown Volker M Welter grounds the designer's California works in comparison with his pre-exile projects and the compositions of fellow architects in California In the 1920s Fischer created experimental working class housing estates in Germany that pioneered ecological construction and living practices Comparable to their predecessors Fischer's California buildings revolve around the functioning the organization of a home as he defined domestic architecture in 1926 Featuring new photography and detailed architectural plans this book is an original contribution to the literature on Southern California's built heritage **Historic Pasadena** Ann Scheid, Ann Scheid Lund, 1999 **Street Level: Los Angeles in the Twenty-First Century** Rob Sullivan, 2016-04-01 In the latter part of the 20th a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been hugely influential in thinking about cities more broadly The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken The first section of this book Contra This and Contra That provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative The second part of the book is an investigation of L A as it exists on the ground today While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi-layered complex and ever-changing qualities It concludes by arguing that sectorised off and totalizing visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do one that replicates the polymer nature of this place It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend
