Eadie,2012-10-01 This book examines the contents influence and

potential of a personal selection of modern books published over the last fifty years that have been relevant to improving welfare. The works selected comprise three earlier classics that mainly deal with animal experimentation and intensive farming as well as five that concentrate on specific subject areas namely history science applied ethics politics and law that are important to protecting the welfare of animals against suffering inflicted by humans. The books are arranged in the order of their publication date and for each one a few related works are also mentioned or discussed. This collection provides a broad understanding of animal protection issues and provides the necessary basis for an informed and comprehensive approach to improving the welfare of animals. The books selected have been influential and they have the potential to improve animal welfare in the future.

Lawrence Podolsky,Sonja Lea Wallace,Victor Lukas,1999-03-25 The framers of the 1985 amendments to the Federal Animal Welfare Act AWA envisioned the Institutional Animal Care and Use Committee IACUC as the linchpin the central and cohesive element of the laboratory animal care and use program at research education and testing organizations Effective operation of this

committee is essential if these organizations are to achieve full regulatory compliance and more importantly retain the public's support for activities involving the use of animal subjects. In 1987 the Scientists Center for Animal Welfare in cooperation with the American Association for Laboratory Animal Science published a compilation of presentations made at five regional workshops on effective operation of IACUCs. In the decade since this compilation was published nearly all of the 18 consensus recommendations developed by the workshop participants and the Center's Board of Trustees have either been incorporated into the AWA regulations or have been voluntarily adopted by institutions using animals subjects. The Care and Feeding of an IACUC: The Organization and Management of an Institutional Animal Care and Use Committee superbly illustrates the progress and advances the animal using communities have made in implementing these and other improvements in their animal care and use programs. The highly qualified contributors provide twelve information packed chapters and ten appendices that provide IACUC chairs and members with an indispensable reference. This book summarizes information critical to the effective and efficient management and operation of an IACUC and as such should be made available to IACUC members and administrative officials in every institution using laboratory animals.
