global governance Exploring the changes needed to move toward a new more equal postcolonial world order Chan offers a vision of global justice rooted in the unrealized egalitarian aspirations of anticolonial thinker activists prompting us to rethink what decolonization may mean today

The Return of Inequality Mike Savage,2021-05-18 A pioneering book that takes us beyond economic debate to show how inequality is returning us to a past dominated by empires dynastic elites and ethnic divisions The economic facts of inequality are clear The rich have been pulling away from the rest of us for years and the super rich have been pulling away from the rich More and more assets are concentrated in fewer and fewer hands Mainstream economists say we need not worry what matters is growth not distribution In The Return of Inequality acclaimed sociologist Mike Savage pushes back explaining inequality's profound deleterious effects on the shape of societies Savage shows how economic inequality aggravates cultural social and political conflicts challenging the coherence of liberal democratic nation states Put simply severe inequality returns us to the past By fracturing social bonds and harnessing the democratic process to the strategies of a resurgent aristocracy of the wealthy inequality revives political conditions we thought we had moved beyond empires and dynastic elites explosive ethnic division and metropolitan dominance that consigns all but a few cities to irrelevance Inequality in short threatens to return us to the very history we have been trying to escape since the Age of Revolution Westerners have been slow to appreciate that inequality undermines the very foundations of liberal democracy faith in progress and trust in the political community's concern for all its members Savage guides us through the ideas of leading theorists of inequality including Marx Bourdieu and Piketty revealing how inequality reimposes the burdens of the past At once analytically rigorous and passionately argued The Return of Inequality is a vital addition to one of our most important public debates

Since the early 2000s zombies have increasingly swarmed the landscape of popular culture with ever more diverse representations of the undead being imagined A growing number of zombie narratives have introduced sexual themes endowing the living dead with their own sexual identity The unpleasant idea of the sexual zombie is itself provocative triggering questions about the nature of desire sex sexuality and the politics of our sexual behaviors However the notion of zombie sex has been largely unaddressed in scholarship This collection addresses that unexamined aspect of zombiedom with essays engaging a variety of media texts including graphic novels films television pornography literature and internet meme culture The essayists are scholars from a variety of disciplines including history theology film studies and gender and queer studies Covering *The Walking Dead* *Warm Bodies* and Bruce LaBruce's zombie porn movies this work investigates the cultural political and philosophical issues raised by undead sex and zombie sexuality *Wealth, Poverty and Enduring Inequality* Sarah Kerr, 2024-09-27

The rich and the poor in the UK are subject to radically different legislative approaches While the behaviours of the poor are relentlessly scrutinised those of the rich are ignored or enabled In this book Sarah Kerr suggests that we live in a state of wealtherty characterised by the hyper concentration of wealth and a stark distinction between the rich and the rest Drawing on evidence from the 1500s onwards she reveals a long history of government scrutiny of the poor and ignorance of the rich She contests contemporary policy and practice which disregards the enduring role of the rich in the production of poverty and poverty in the production of the rich In pursuit of social and economic justice this radical book challenges policy makers and researchers to stop talking about poverty and to start addressing the problems caused by wealtherty *Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century* Rocio Garcia-Carrion, Roseli Rodrigues De Mello, Arnetha F. Ball, 2020-03-24

Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous Roma migrant children students with disabilities and those affected by poverty A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns dropout rates disengagement in the school experiences of children and youth traditionally excluded Research also suggests the negative consequences for child development including cognitive language and social emotional functioning of poverty and lack of quality education in the early years Consequently the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects their right to education for those minorities This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected Scholars worldwide are looking for successful actions with children youth and communities of

learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence, and multidisciplinary interventions oriented towards achieving social impact, which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of Schools as Learning Communities is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs), that is, those interventions that improve students' achievement and social cohesion and inclusion in many diverse contexts regardless of the socioeconomic, national, and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.
