

Film study : Gattaca

A film by *Andrew Niccol* ; starring *Ethan Hawke, Uma Thurman, Jude Law* in the main parts.

Vincent's story :

- How was he conceived? (naturally /artificially?)
- When he was born, what did doctors predict?
- His childhood : describe his relationship with his brother : how can you explain it?
- What was his dream?
- What was his first job ?
- How did he manage to enter Gattaca? Describe all the things he had to do.
- Who is Jerome Morrow?
- The society in which Vincent lives is divided into two categories : what are these two categories? Pick out all the words referring to both categories during the film.

Vincent in Gattaca

- Where is he scheduled to go? When?
- What happens in the space academy?
- What clue do the police find?
- Describe Vincent's relationship with Irene
- Eventually, what happens to Vincent? To Jerome?

Here is an introduction to the film . Fill in the blanks with the appropriate word :

As a -----, Vincent discovers that he is -----from his younger brother, Anton, a Petri dish -----who possesses the perfect -----for success. Where Anton is -----and tall and has perfect eyesight, Vincent is -----and sickly and wears -----that give away his genetic inferiority. When Anton earns his parents' constant praise, encouragement and -----, Vincent is coddled, -----and kept at----- . But there is no gene for the human ----- and Vincent finds that this is the key to changing his-----.

Cole University of Texas Health Science Center at Houston Metapsychology **Ending Life** Margaret Pabst Battin, 2005-05-05 Margaret Pabst Battin has established a reputation as one of the top philosophers working in bioethics today This work is a sequel to Battin s 1994 volume The Least Worst Death The last ten years have seen fast moving

developments in end of life issues from the legalization of physician assisted suicide in Oregon and the Netherlands to furor over proposed restrictions of scheduled drugs used for causing death and the development of NuTech methods of assistance in dying Battin's new collection covers a remarkably wide range of end of life topics including suicide prevention AIDS suicide bombing serpent handling and other religious practices that pose a risk of death genetic prognostication suicide in old age global justice and the duty to die and suicide physician assisted suicide and euthanasia in both American and international contexts As with the earlier volume these new essays are theoretically adroit but draw richly from historical sources fictional techniques and ample factual material

Genetic Information Alison K. Thompson, Ruth F.

Chadwick, 2007-07-23 It is difficult to think of an example of an advancement in the biological sciences that has had an impact on society similar to that of the new genetics Recent developments in biotechnology have occasioned much discussion among academics professionals and lay people alike In particular many questions and concerns have arisen over the acquisition access and control of genetic information There are several reasons why the new genetics has commanded such widespread attention and why it is now the subject of considerable debate Special reference is given in this volume to the implications of genetic information for five different subject areas eugenics the insurance industry the commercialisation of genetic testing strategies for raising public awareness and the value of theoretical ethical and sociological frameworks in the debate This diverse collection of papers attempts to address and critically discuss issues surrounding the control of and access to genetic information from ethical medical legal and theoretical points of view The first and shortest section of the book attempts to address concerns over the eugenic potential of new biotechnologies It also provides a historical context for the debate for controversy over the subject of eugenics predates the current debate over genetic information by a considerable length of time Indeed by the time the first patent was issued for Chakrabarty's strain of oil eating bacteria in the early 1970s the term eugenics had already acquired strong pejorative connotations

Difference and Identity

Jonathan M. Metzl, Suzanne Poirier, 2005-07-15 In an increasingly diverse society it is essential that medicine be aware of matters of difference Medical humanities programs promote awareness of the social aspects of medicine and the Association of American Medical Colleges has recently instituted cultural competencies for clinical interaction for the training of medical students Yet these efforts to impart understanding of the cross cultural aspects of medicine are still hindered by a significant limitation within a medical system whose currency is diagnosis difference is primarily defined through disease This special issue of Literature and Medicine focuses on difference and identity in the context of disease and disability The articles collected here explore the complex ways in which notions of disease disability and difference are related and in which bodies marked by gender race disability sexuality and ethnic identities experience disease in specific ways The essays take a humanities based approach to the subject and emphasize an awareness and sensitivity to difference through forms of symbolic representation such as metaphor and narrative This volume provides a heuristic lens through which relationships

between individual expressions of identity and communal experiences of difference can be considered Each article speaks to the process whereby individual stories and strategies shape and are in turn shaped by the institutions they seek to transform Literature and Medicine is devoted to exploring interfaces between literary and medical knowledge and understanding The journal showcases the creative and critical work of renowned physician writers leading literary scholars and medical humanists

The Picture of Health Henri Colt, Silvia Quadrelli, Friedman Lester, 2011-05-10 Film and literature have long been mined for interesting examples and case studies in order to teach biomedical ethics to students This volume presents a collection of about 80 very brief accessible essays written by international experts from medicine social sciences and the humanities all of whom have experience using film in their teaching of medical ethics Each essay focuses on a single scene and the ethical issues it raises and the volume editors have provided strict guidelines for what each essay must do while also allowing for some creative freedom While some of the films are obvious candidates with medical themes Million Dollar Baby The Diving Bell and the Butterfly some are novel choices such as Pan's Labyrinth or As Good as It Gets The book will contain several general introductory chapters to major sections and a complete filmography and cross index at the end of the book where readers can look up individual films or ethical issues
