This book sheds light on the clash of two institutional logics within the new attention economy and its consequences on the competitive landscape. The legacy media institutional logics represented by the legacy media conglomerates revolving around the Hollywood studios which have established their primacy in the global mediascape for decades now directly compete in the new landscape shaped by digital convergence with the digital media institutional logics identifying the tech giants emerging victorious from the digital revolution. The analysis utilizes the dichotomy between scripted and non-scripted media entertainment as a framework to assess the diverse competitive landscapes, business dynamics and their implications of the different segments shaping the contours and boundaries of the media industry.
