- They looked at the wear on his teeth.
- Answers will vary.
- It was necessary to do the work very carefully so that the body could be removed intact.
- By creating conditions similar to those on the mountain, the scientists could prevent the body from decaying.
- One can conclude that the Iceman was probably a hunter and accustomed to outdoor life.
- They could not quickly determine his age, what the meaning of the tattoo marks were, or how he died.
- Several independent tests corroborated the results.
- The weight of the snow and ice on the Iceman's face probably pressed his features into an expression that looked like a grimace.
- The dry, icy winds dehydrated the body.
- The first step after the body was discovered was an endeavor to remove it from the mountain.
- The scientists concluded that he was between thirty and forty years old at the time of death.
- It would be inaccurate because scientists were electrified by the discovery.
