Retrofitting Sprawl Emily Talen, 2015-08-15 These twelve previously unpublished essays present innovative and practical ideas for addressing the harmful effects of sprawl Sprawl is not only an ongoing focus of specialized magazines like *Dwell* indeed *Time* magazine has cited recycling the suburbs as the second of Ten Ideas Changing the World Right Now While most conversations on sprawl tend to focus on its restriction this book presents an overview of current thinking on ways to fix repair and retrofit existing

sprawl Chapters by planners geographers designers and architects present research grounded in diverse locales including Phoenix Arizona Seattle Washington Dublin Ohio and the Atlanta Georgia and Washington D C metro areas The authors address head on the most controversial aspects of sprawl issues of power and control justice and equity and American attitudes about regulating private development But they also put these issues in practical contexts bringing in examples of redesign that are already occurring around the country including the retrofitting of corridors and the repurposing of cul de sacs Whether fixing sprawl requires a cultural shift in thinking or a coordinated effort by local government these essays testify that a combination of forethought and creative thinking will be needed Gale's Auto Sourcebook 2 Karen Hill,1992-05 This book is designed to present in one convenient source comments published in periodicals about 325 automobile models manufactured since 1987 on a model by model basis These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models *Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction* Stefanie Strebel,2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters **The Right to Suburbia** Willow S Lung-Amam,2024-09-17 In recent decades American suburbs have undergone a so called renaissance as multiple forces have transformed them into denser urban landscapes Yet at the same time suburban racial diversity immigration and poverty rates have surged The Right to Suburbia investigates how marginalized communities in the suburbs of Washington DC one of the most intensely gentrifying metropolitan regions in the United States have battled the uneven costs and benefits of redevelopment Willow Lung Amam narrates the efforts of activists community groups and political leaders fighting for communities right to suburbia that is their right to stay put and benefit from new neighborhood investments Revealing the far reaching impacts of state led redevelopment The Right to Suburbia shows how patterns of unequal racialized development and displacement are being produced and reproduced in suburbs and how communities are fighting back *Infinite Suburbia* MIT Norman B. Leventhal Center for Advanced Urbanism,2018-03-13 Infinite Suburbia is the culmination of the MIT Norman B Leventhal Center for Advanced Urbanism s yearlong study of the future of suburban development Extensive research an exhibition and a conference at MIT s Media Lab this groundbreaking collection presents fifty two essays by seventy four authors from twenty different fields including but not

Urban Revitalization Carl Grodach, Renia Ehrenfeucht, 2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline The Great Recession brought additional challenges to planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems It is crucial that students of urban revitalization recognize these challenges their impacts on different populations and the implications for crafting effective and equitable revitalization policy

Urban Revitalization Remaking Cities in a Changing World will be a guide in this learning process This textbook will be the first to comprehensively and critically synthesize the successful approaches and pressing challenges involved in urban revitalization The book is divided into five sections In the introductory section we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio cultural factors in explaining urban change Stemming from this we will explain the significance of revitalization and present a summary of the key debates issues and conflicts surrounding revitalization efforts Section II will examine the historical causes for decline in central city and inner ring suburban areas and shrinking cities and building from the conceptual framework discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes Section III will introduce students to the analytical techniques and key data sources for urban revitalization planning Section IV will provide an in depth critical discussion of contemporary urban revitalization policies strategies and projects This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts including the urban core central city neighborhoods suburban areas and shrinking cities Lastly Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future Urban Revitalization will integrate

academic and policy research with professional knowledge and techniques Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes A unique feature will be chapter specific case studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues The book will be written in an accessible style and thoughtfully organized to provide graduate and upper level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals **Interplaces** Nicholas A. Phelps, 2017

Much of the world's economic activity takes place in between cities and nations the geographical containers that we have taken for granted for hundreds of years now In this book Nicholas Phelps provides a guide to this uncharted territory within urban and economic geography He highlights the importance of intermediary actors and processes in shaping this economy in between From the airports shopping malls and office parks that have sprung up on the road between cities to work done on the move in cars and trains to the decisions made by internationally mobile networks of experts in conferences and negotiations The geography of the economy in between is revealed as one involving four recurring and coexisting economic geographical formations the agglomeration the enclave the networks and the arena Phelps sets out a multidisciplinary perspective and agenda on the question of the how why and where much contemporary economic activity takes place
