The Tragedy of American Science Clifford D. Conner, 2020-05-05 A look at the destructive history of science for profit including its toll on the US pandemic response by the author of *A People's History of Science* Despite a facade of brilliant technological advances American science has led humanity to the brink of interrelated disasters In *The Tragedy of American Science* historian of science Clifford D. Conner describes the dual processes by which this history has unfolded since the Second World War addressing the corporatization and the militarization of science in the US He examines the role of private profit considerations in determining the direction of scientific inquiry and the ways those considerations have dangerously undermined the integrity of sciences impacting food water air medicine and the climate In addition he explores the relationship between scientific industries and the US military discussing the innumerable financial and human scientific resources that have been diverted from other critical areas in order to further military aggrandizement and technological development While the underlying problems may appear intractable Conner compellingly argues that replacing the current science for profit system with a science for human needs system is not an impossible utopian dream and the first step to a better future is grappling with the mistakes of the past
