Freshwater Challenges of South Africa and its Upper Vaal River Anja du Plessis, 2017-02-07 This book promotes better understanding and awareness of South Africa significant water problems by describing the country's and especially the Upper Vaal River's water resources. It is a go-to book for students, professionals, and regular citizens when information is required regarding the country's and more specifically the Upper Vaal River's freshwater resources. It highlights the major problems and risks which need to be addressed and give a realistic and true representation of the current water affairs.

Afrotropical Streams and Rivers Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa. Unlike other books available, the editors present a thorough study of geomorphological, hydrological, biological, and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them. This book, edited by a diverse cohort of researchers and/or scholars, is intended as an educational and practical guide for graduate students, researchers, and scientists who focus on the biodiversity conservation and management policy issues of the African river systems. Provides a comprehensive introduction to African freshwater rivers, their biota, and abiotic processes. Contains unique case studies on African streams and rivers. Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent.

Zero Hour: A Countdown to the Collapse of South Africa's Apartheid System Geoffrey Hebdon,2022-07-15 This enlightening book focuses on the history of how the ethnic groups of Africa eventually joined by white colonizers from Europe created the seedbed for the hateful apartheid system in Southern Africa The reader learns how apartheid began the dehumanizing effects it had on the black population and how it was finally abolished in its zero hour in 1994 Written by historian writer and researcher Geoffrey Hebdon this is the second in a series that covers the experience of a British citizen who emigrated to South Africa during that era and records in vivid detail his responses to the apartheid system and how South Africa and neighbouring countries evolved after apartheid was abolished As well as the first European settlers and the white Afrikaners attempted enslavement of the black population the book also covers the Zulu wars the Anglo Boer wars and individuals who supported apartheid such as Cecil Rhodes and the whites only National Party of South Africa Also covered are prominent leaders of the African National Congress ANC and the black revolutionaries who fought against apartheid many of whom gave their lives or served life sentences for their struggle including Nelson Mandela who became South Africa s first black president after serving years in prison **Seismic Characterization of Carbonate Platforms and**

Reservoirs J. Hendry,P. Burgess,D. Hunt,X. Janson,V. Zampetti,2021-08-17 Modern seismic data have become an essential toolkit for studying carbonate platforms and reservoirs in impressive detail Whilst driven primarily by oil and gas exploration and development data sharing and collaboration are delivering fundamental geological knowledge on carbonate systems revealing platform geomorphologies and how their evolution on millennial time scales as well as kilometeric length scales was forced by long term eustatic oceanographic or tectonic factors Quantitative interrogation of modern seismic attributes in carbonate reservoirs permits flow units and barriers arising from depositional and diagenetic processes to be imaged and

extrapolated between wells This volume reviews the variety of carbonate platform and reservoir characteristics that can be interpreted from modern seismic data illustrating the benefits of creative interaction between geophysical and carbonate geological experts at all stages of a seismic campaign Papers cover carbonate exploration including the uniquely challenging South Atlantic pre salt reservoirs seismic modelling of carbonates and seismic indicators of fluid flow and diagenesis

Acid Mine Drainage and its Governance in the Gauteng City-Region Kerry Bobbins,2015-05-29 Acid mine drainage AMD has generated an enormous amount of media interest and public concern in the Gauteng City Region GCR over the last decade However it has been framed as a narrow technical concern with government action being directed towards securing the necessary engineering and processing solutions as quickly as possible to prevent decant and treat acid mine water to industrial standards This has arguably limited the scope for full discussion and debate on the impacts of AMD particularly for the environment and this bears implications for how AMD has been managed in the GCR Government s immediate short and long term interventions to address AMD have been set out as a straight forward solution but over time more complex environmental concerns have emerged Becoming more evident over the last few years is that one of the main impacts of AMD will be its effect on the overall water security in the Vaal River System VRS on which the GCR relies for its supply of potable water Limits on water abstraction from the VRS together with the increasing need to maintain the overall water quality in the system through dilution and treatment activities means that AMD is beginning to manifest as a binding constraint on economic development and a burden on society in particular via escalating costs for water consumers Fiscal constraints are likely to see GCR residents and businesses pick up more and more of the costs associated with the treatment of AMD through the format of increased municipal tariffs With final decisions on municipal tariffs now pending the broader yet invisible impacts of AMD loom large This means that the debate has moved far beyond the issue of predicted decant in each of the Witwatersrand s mining basins Water security for the GCR and who will carry the costs associated with the long term treatment of AMD have instead taken centre stage This paper carefully updates the historical record on AMD since the publishing of a GCRO Provocation on the issue in 2010 In doing so it argues that the way in which AMD has been governed raises a flag around how the political economy of an issue such as AMD should be understood publicly debated and managed In particular it suggests that the governance of an environmental challenge such as AMD is not only about finding a technical solution The lack of platforms to ensure well informed public deliberation especially over such issues as who will pay and how must be addressed to ensure more equitable and transparent decision making In light of the broader mine waste legacy inherited by the GCR and the strong likelihood of environmental contamination becoming more commonplace in the future these concerns are not only limited to AMD They will only grow in importance over time **Corrupted** Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death

Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Mintirho ya Vulavula* Jabulisile Mhlambi, Sandile Ngidi, 2021-04-19 *Mintirho ya Vulavula* Arts National Identities and Democracy examines the role of arts and culture in development and specifically its value in consolidating our nascent democracy and in facilitating the transformation of South African society Contributors to this edited volume interrogate the role of arts culture and heritage from a transdisciplinary perspective enriched by the cross generational perspectives offered by young and older artists cultural practitioners activists and scholars Authors also offer some policy recommendations on how the contribution of arts and culture to social cohesion and nation building can be enhanced **Colonial Survey and Native Landscapes in Rural South Africa, 1850 - 1913** Lindsay F. Braun, 2014-10-16 In *Colonial Survey and Native Landscapes in Rural South Africa 1850 1913* Lindsay Frederick Braun explores the technical processes and struggles surrounding the creation and maintenance of boundaries and spaces in South Africa in the nineteenth and early twentieth centuries The precision of surveyors and other colonial technicians lent these enterprises an illusion of irreproachable objectivity and authority even though the reality was far messier Using a wide range of archival and printed materials from survey departments repositories and libraries the author presents two distinct episodes of struggle over lands and livelihoods one from the Eastern Cape and one from the former northern Transvaal These cases expose the contingencies contests and negotiations that fundamentally shaped these changing South African landscapes

Systems Architecture and Technology: Proceedings of 40th Anniversary International Conference on Information Systems Architecture and Technology - ISAT 2019 Leszek Borzemski, Jerzy Świątek, Zofia Wilimowska, 2019-09-04

This three volume book highlights significant advances in the development of new information systems technologies and architectures. Further, it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data. Each chapter provides an analysis of a specific technical problem followed by a numerical analysis, simulation, and implementation of the solution to the real world problem. Managing an organization especially in today's rapidly changing environment is a highly complex process. Increased competition in the marketplace especially as a result of the massive and successful entry of foreign businesses into domestic markets, changes in consumer behaviour, and broader access to new technologies and information calls for organisational restructuring and the introduction and modification of management methods using the latest scientific advances. This situation has prompted various decision making bodies to introduce computer modelling of organization management systems. This book presents the peer reviewed proceedings of the 40th Anniversary International Conference Information Systems Architecture and Technology ISAT held on September 15-17, 2019 in Wrocław, Poland. The conference was organised by the Computer Science Department, Faculty of Computer Science and Management, Wrocław University of Sciences and Technology, and University of Applied Sciences in Nysa, Poland. The papers have been grouped into three major sections. Part I discusses topics including but not limited to artificial intelligence, methods, knowledge discovery, and data mining, big data, knowledge based management, Internet of Things, cloud computing, and high performance computing, distributed computer systems, content delivery networks, and service oriented computing. Part II addresses various topics such as system modelling for control, recognition, and decision support, mathematical modelling in computer system design, service oriented systems, and cloud computing, and complex process modelling. Part III focuses on a number of themes like knowledge based management, modelling of financial and investment decisions, modelling of managerial decisions, production systems, management and maintenance, risk management, small business management, and theories and models of innovation.

The Common Good and Environmental Governance for the Support of Life

Laura Westra, 2016-08-17. The ongoing environmental crisis has given rise to grave concerns everywhere, and a number of authors have approached this topic from various disciplines and points of view, proposing different strategies to address and correct the situation. A major problem, however, is presented by the role and possible efficiency of existing legal regimes, most of which do not consider seriously the ecological problems that are the basis of most of the global problems that beset us. In 2015, Italy hosted the 2015 Expo of Milano, an important fair that attempted to address some of these major issues, primarily the availability of safe food and water, and the legal regimes that govern their distribution. The conference that resulted in this volume took place at the University of Parma, an old university in a city roughly one hour away. This volume discusses a variety of environmental and ecological issues from the standpoint of existing legal instruments, with a primary focus on the

necessity for ecologically oriented governance in order to mitigate and redress a situation that at present supports multiple human rights violations

The implementation of international law in Germany and South Africa Mehrdad Payandeh, Silja Vöneky, Dire Tladi, Alexander Proelss, Patrick Vrancken, Leonie Hensgen, Engela Schlemmer, Wolfgang Durner, Lisa Chamberlain, Tumai Murombo, Nicola Wenzel, Lilian Chenwi, Kirsten Schmalenbach, Christopher Gevers, Bonolo Dinokopila, Matthias Herdegen, 2015-07-23 South Africa the power house of the African continent as well as Germany Europe's largest economic power are faced with an intricate maze of international obligations whether related to the United Nations the World Trade Organization the African Union or the European Union EU international human rights law international humanitarian law or any other sub regime of international law The two countries are in a different position when facing the implementation of this maze of obligations South Africa is a developing economy that faces various capacity challenges which at times also impact the manner and extent to which it implements its international treaty obligations Germany on the other hand benefits from comparatively well funded institutes of international law and a well trained academic community which have contributed to the successful implementation of much of international law But as the relevant chapters in this volume show the German case is not without its own complexities As a result an exchange of ideas and experiences pertaining to the implementation of international obligations can prove fruitful for both countries Moreover such an exchange could also serve as a useful point of departure for other countries in Southern Africa that face similar challenges in relation to implementation The current book explores suitable techniques of implementation of international law by comparing South Africa with Germany After a general overview of the status of international law within Germany and South Africa respectively it focuses on the implementation of international instruments pertaining to key sub areas of international law in the two countries These include the United Nations Charter peace and security the international law of the sea international economic law international environmental law international human rights law international criminal law regional integration and the status of international judicial decisions before domestic courts

Naturalizing Inequality Michela Marcatelli, 2021-10-05 The book discusses the reproduction and legitimization of racial inequality in post apartheid South Africa Michela Marcatelli unravels this inequality paradox through an ethnography of water in a rural region of the country She documents how calls to save nature have only deepened and naturalized inequality

Microstructural Geochronology Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-11-17 Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time This volume integrates two aspects of geochronology one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products The chapters illustrate how material science techniques are taking this field to the atomic scale enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the

most resilient materials in the solar system First compilation of research focusing on the crystal structure material properties and chemical zoning of the geochronology mineral archive down to nanoscale Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography Microstructural Geochronology will be a valuable resource for graduate students academics and researchers in the fields of petrology geochronology mineralogy geochemistry planetary geology astrobiology chemistry and material science It will also appeal to philosophers and historians of science from other disciplines
