The Electrical World, 1894 **Weeding and Sowing** Hans Freudenthal, 2007-05-08 A title that sounds like poetry and a subtitle that seems to contradict the title But the subtitle is right and originally it was just the title A strange subtitle isn't it Preface to a Science of Mathematical Education All sciences in their prenatal stage have known this kind of literature only the term used was not Preface but for instance Prolegomena which means the same though it sounds less provisional In fact such works were thicker than the present one by up to ten times There is much more that can be said about a science before it comes into being than after with the first results comes modesty This is the preface to a book that will never be written not by me nor by anybody else Once a science of mathematical education exists it will get the preface it deserves Nevertheless this preface or what for honesty's sake I have labelled so must fulfil a function the function of accelerating the birth of a science of mathematical education which is seriously impeded by the unfounded view that such already exists Against this view I have to argue it rests on a wrong estimation both over and under estimation at the same time of what is to be considered as science
