Doctoral Degree Programs in Law Kenneth K. Mwenda,2021-11-05 This book offers a critical and insightful study of various doctoral programs in law focusing on the English speaking world That the structures of doctoral degree programs in law differ between the United States and much of the Commonwealth are an issue that requires no debate What is missing in the discourse however is a narrative on how these programs are structured and how they compare This book attempts to fill that gap A key objective of the study is to provide an international and comparative analysis of the efficacy of the American and British styled models of law doctorates In so doing it provides a conceptual and theoretical framework for the development of effective doctoral programs in law contending that the defining characteristic of a doctorate is that it recognizes an independent contribution to the subject rather than the completion of taught coursework however advanced The book goes on to examine the concept of a higher doctorate in law as a possible means of strengthening the concept of a law doctorate in legal academia This book was written against the backdrop of the recently adopted Global Convention on the Recognition of Qualifications concerning higher education It was adopted by the UNESCO General Conference in Paris on November 25 2019 making it the first United Nations treaty on higher education with a global scope The target audience of the book includes scholars in higher education scholars in legal education law school deans and administrators law professors and students Ministries of Higher Education in countries around the globe accrediting agencies for doctoral studies bar admission and legal education societies and UNESCO and other international organizations Directory of Special Libraries and Information Centers ,2009 Transcendent Development Andani Thakhathi,2022-01-28 Transcendent Development contains morally courageous creative storytelling prose offering paradigm shifts empirical evidence and

surprising antenarratives that explain how a harmonious Africa may be realised starting in the Mother Continent's Southern most tip **New African** ,2004 *Corrupted* Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly **Inventors, Bright Minds and Other Science Heroes of South Africa** Engela Duvenage,2021-07-01 In this book you will read all about inventors bright minds and other brilliant science heroes of South Africa You'll read the stories of people who made medical breakthroughs Stories about people who love animals and plants Stories about people who try to understand the secrets of the sky Stories about people who made interesting discoveries about fossils the earth water and the climate This is a truly South African book that will inspire all readers to question to explore and discover and to create The Directory of MBAs ,1999 African Topics ,1998
