Applied Practice English Key:

English Pronunciation Teaching and Research Martha C. Pennington, Pamela Rogerson-Revell, 2018-09-07 This book offers contemporary perspectives on English pronunciation teaching and research in the context of increasing multilingualism and English as an international language. It reviews current theory and practice in pronunciation pedagogy, language learning, language assessment, and technological developments and presents an expanded view of pronunciation in communication, education, and employment. Its eight chapters provide a comprehensive and up-to-date analysis of pronunciation and the linguistic and social functions it fulfills. Topics include pronunciation in first and second language acquisition, instructional approaches, and factors impacting teachers' curriculum decisions; methods for assessing pronunciation; the use of technology for pronunciation teaching; learning and testing pronunciation; issues of teachers who are second language speakers; and applications of pronunciation research and pedagogy in L1 literacy and speech therapy, forensic linguistics, and health, workplace, and political communication. The chapters also critically examine the research base supporting specific teaching approaches and identify research gaps in need of further investigation. This rigorous work will provide an invaluable resource for teachers and teacher educators, in addition to researchers in the fields of applied linguistics, phonology, and communication.

Evolution of English Language Teaching Deepti Gupta, 2025-03-05 This book offers a machine-generated literature survey review of the vibrant history and multifaceted dimensions of English Language Teaching (ELT). Each chapter is organized by the book editor along a chronological progression and begins with a human-written introduction. Each chapter chronicles a stage in ELT's growth, using publication dates as reference points and providing summaries of selected publications, offering readers the freedom to explore the various aspects of ELT. This reader-friendly volume accommodates diverse readers, including students, educators, researchers, policymakers, and anyone intrigued by the intricate tapestry of English Language Teaching. It's a comprehensive journey through the evolution of ELT, reflecting its synchronous and diachronic dimensions, all within a single accessible volume. The auto-summaries have been generated by a recursive clustering algorithm via the Dimensions Auto Summarizer by Digital Science. The editors of this book selected which Springer Nature content should be auto-summarized and decided its order of appearance. Please be aware that these are extractive auto-summaries which consist of original sentences but are not representative of the original paper since we do not show the full length of the publication.
