Markets with Limits James Stacey Taylor,2022-03-02 In Markets with Limits James Stacey Taylor argues that current debates over the moral limits of markets have derailed He argues that they focus on a market critical position that almost nobody holds That certain goods and services can be freely given away but should never be bought or sold And he argues that they focus on a type of argument for this position that there is reason to believe that nobody holds That trade in certain goods or services is wrongful solely because of what it would communicate Taylor puts the debates over the moral limits of markets back on track He develops a taxonomy of the positions that are actually held by critics of markets and clarifies the role played in current moral and political philosophy by arguments that justify or condemn certain actions owing in part to what they communicate Taylor argues that the debates have derailed because they were conducted in accord with market rather than academic norms and that this demonstrates that market thinking should not govern academic research Markets with Limits concludes with suggestions as to how to encourage academics to conduct research in accord with academic norms and hence improve its quality Key features Provides original suggestions concerning how to improve the exegetical quality of academic research Systematically identifies the primary exegetical errors and the ways in which these errors have adversely influenced current debates that Jason Brennan and Peter Jaworski made in their influential book Markets Without Limits Argues that despite the current widespread view that semiotic objections to markets are widespread in the literature they are in actuality rare to nonexistent Offers an up to date taxonomy of the current arguments in the various debates over both the ontological and the moral limits of markets Provides an extensive overview of mistaken claims that have been made and propagated in various academic literatures **The Law Times** ,1859
