ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05 *Higher Education Pathways* Ashwin, Paul, Case, Jennifer M., 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development

of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues *Language Policy in Higher Education* F. Xavier Vila Moreno, Vanessa Bretxa, 2014-12-05 In today's increasingly interconnected knowledge based world language policy in higher education is rapidly becoming a crucial area for all societies aiming to play a part in the global economy The challenge is double faceted how can universities retain their crucial role of creating the intellectual elites who are indispensable for the running of national affairs and at the same time prepare their best educated citizens for competition in a global market To what extent is English really pushing other languages out of the academic environment Drawing on the experience of several medium sized language communities this volume provides the reader with some important insights into how language policies can be successfully implemented The different sociolinguistic contexts under scrutiny offer an invaluable comparative standpoint to understand what position can or could be occupied by each language at the level of higher education *Logics in Artificial Intelligence* Eduardo Fermé, Joao Leite, 2014-09-16 This book constitutes the proceedings of the 14th European Conference on Logics in Artificial Intelligence JELIA 2014 held in Funchal Madeira Portugal in September 2014 The 35 full papers and 14 short papers included in this volume were carefully reviewed and selected from 121 submissions They are organized in topical sections named description logics automated reasoning logics for uncertain reasoning non classical logics answer set programming belief revision dealing with inconsistency in ASP and DL reason about actions and causality system descriptions short system descriptions and short papers The book also contains 4 full paper invited talks **Collected Papers. Understanding and Utilizing Informal Archives Hai-Jew, Shalin, 2025-07-29 Informal archives hold untapped value
 for research historical inquiry and cultural preservation These archives often include rare or unique content such as letters
 photos recordings or academic papers that may otherwise be lost to time As interest grows in alternative sources of
 knowledge understanding how these collections are formed authenticated and used becomes increasingly important They
 raise critical questions about ownership access preservation and ethical responsibility especially when inherited or acquired
 through informal means Exploring these archives sheds light on overlooked narratives and challenges conventional
 boundaries of what constitutes legitimate archival material Understanding and Utilizing Informal Archives explores how
 informal archives are collected and used for research and other practical applications It discusses strategies to formalize
 some of the processes in handling informal archives Covering topics such as cultural divides intellectual property and
 research methods this book is an excellent resource for archivists collectors researchers students educators academicians
 librarians and more *Biomaterials and Bioactive Molecules to Drive Differentiation in Striated Muscle Tissue Engineering*
 Valentina Di Felice, Giancarlo Forte, Dario Coletti, 2016-05-18 Tissue engineering is an innovative multidisciplinary approach
 which combines bio materials cells and growth factors with the aim to obtain neo organogenesis to repair or replenish
 damaged tissues and organs The generation of engineered tissues and organs e g skin and bladder has entered into the
 clinical practice in response to the chronic lack of organ donors In particular for the skeletal and cardiac muscles the
 translational potential of tissue engineering approaches has clearly been shown even though the construction of this tissue
 lags behind others given the hierarchical highly organized architecture of striated muscles Cardiovascular disease is the

leading cause of death in the developed world where the yearly incidence of Acute MI AMI is approx 2 million cases in Europe Recovery from AMI and reperfusion is still less than ideal Stem cell therapy may represent a valid treatment However delivery of stem cells alone to infarcted myocardium provides no structural support while the myocardium heals and the injected stem cells do not properly integrate into the myocardium because they are not subjected to the mechanical forces that are known to drive myocardial cellular physiology On the other hand there are many clinical cases where the loss of skeletal muscle due to a traumatic injury an aggressive tumour or prolonged denervation may be cured by the regeneration of this tissue In vivo stem or progenitor cells are sheltered in a specialized microenvironment niche which regulates their survival proliferation and differentiation The goal of this research topic is to highlight the available knowledge on biomaterials and bioactive molecules or a combination of them which can be used successfully to differentiate stem or progenitor cells into beating cardiomyocytes or organized skeletal muscle in vivo Innovations compared to the on going trials may be 1 the successful delivery of stem cells using sutural scaffolds instead of intracoronary or intramuscular injections 2 protocols to use a limited number of autologous or allogeneic stem cells 3 methods to drive their differentiation by modifying the chemical physical properties of scaffolds or biomaterials incorporating small molecules i e miRNA or growth factors 4 methods to tailor the scaffolds to the elastic properties of the muscle 5 studies which suggest how to realize scaffolds that optimize tissue functional integration through the combination of the most up to date manufacturing technologies and use of bio polymers with customized degradation properties

Where Am I in the Picture? Claudia Mitchell,Katarina Giritli-Nygren,Relebohile Molestane,2023-12-18 Positionality and researcher reflexivity how to account for one s subject position remain as challenges for new researchers But they also remain as challenges for experienced researchers who are often involved in multiple research projects simultaneously Where Am I in the Picture sheds light on the idea of researcher positionality through visual methodologies particularly in the context of studying rurality in Canada Sweden and South Africa The book is intended for new and experienced researchers seeking to decolonize their own perspectives in research in the social sciences and humanities It incorporates photographs drawings and memory work to highlight the social constructedness of what counts as rural Drawing together compelling narratives from researchers about their positionality in studying rurality the book highlights a need for greater attention to where we are in the picture more broadly It suggests that when it comes to the rural researchers need to rethink the interplay of dominant images insider and outsider perspectives and what this interplay means in relation to interpretation Where Am I in the Picture presents a new vision of how to take into consideration positionality in research

Research Handbook on the Ombudsman Marc Hertogh,Richard Kirkham,2018-11-30 The public sector ombudsman has become one of the most important administrative justice institutions in many countries around the world This international and interdisciplinary Research Handbook brings together leading scholars and practitioners to discuss the state of the art of ombudsman research It uses new empirical studies and competing

theoretical explanations to critically examine important aspects of the ombudsman's work This comprehensive Handbook is of value to academics designing future ombudsman studies and practitioners and policymakers in understanding the future challenges of the ombudsman

Doctoral Education in South Africa Nico Cloete, Johann Mouton, 2015-12-08 Worldwide

In Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously
