Sustainable Policy Applications for Social Ecology and Development Carayannis, Elias G.,2012-05-31 Social ecology is a philosophy rooted in deep seated social problems particularly in hierarchical political and social systems Social ecologists throughout the world maintain a theory that present ecological problems cannot be clearly understood much less resolved without resolutely dealing with problems within society Therefore social ecology locates the roots of these ecological crises firmly in the relations of domination between people Sustainable Policy Applications for Social Ecology and Development establishes a new set of platforms for intellectual discourse and identification of critical and strategic emerging issues the formulation of cogent and useful policies and practice recommendations This publication highlights provocative but scholarly views that diverge from the current conventional wisdom taking into consideration the concepts of robust competitiveness sustainable entrepreneurship and democratic capitalism central to its philosophy and objectives The aim of this book is to highlight emerging research and practice at the dynamic intersection of these fields where individuals organizations industries regions and nations are harnessing creativity and invention to achieve and sustain growth **Software Engineering Methods Design and Application** Radek Silhavy,Petr Silhavy,2024-10-22 This book dives into contemporary research methodologies emphasising the innovative use of machine learning and statistical techniques in software engineering Exploring software engineering and its integration into system engineering is pivotal in advancing computer science research It features the carefully reviewed proceedings of the Software Engineering Research in System Science session of the 13th Computer Science Online Conference 2024 CSOC 2024 held virtually in April 2024 **Intelligent Systems Applications in Software Engineering** Radek Silhavy,Petr Silhavy,Zdenka Prokopova,2019-09-19 This book presents real world problems and exploratory research that describes novel approaches in software engineering cybernetics and algorithms in the context of intelligent systems It constitutes the refereed proceedings of the 3rd Computational Methods in Systems and Software 2019 CoMeSySo 2019 conference a groundbreaking online conference that provides an international forum for discussing the latest high quality research results **Software Engineering Application in Systems Design** Radek Silhavy,Petr Silhavy,Zdenka Prokopova,2023-01-01 This book presents the latest research on software engineering application in informatics The fields of software engineering informatics computer science and artificial intelligence are critical for study in the intelligent systems issue space This is the first part of the refereed proceedings of the 6th Computational Methods in Systems and Software 2022 CoMeSySo 2022 The CoMeSySo 2022 conference which is being hosted online is breaking down barriers CoMeSySo 2021 aims to provide a worldwide venue for debate of the most recent high quality research findings *Tourism and Hospitality for Sustainable Development* Emmanuel Ndhlovu,Kaitano Dube,Tawanda Makuyana,2024-09-12 The travel and hospitality industry in the 21st century cannot be conceived planned advertised run or researched without the use of digital technology and innovation Sustainable development in this sector

cannot be achieved without considering the Fourth Industrial Revolution. The use of technology not only enhances the industry's profitability but also helps it to respond effectively to pressing global sustainability issues such as pandemics, climate change, energy crises, workforce shortages, and hyperinflation. Furthermore, technology allows the sector to fully evaluate its current and future economic, social, and environmental impacts, addressing the needs of tourists, businesses, the environment, and destinations. However, implementing technology is not a simple process and involves various opportunities, costs, and challenges that differ depending on the geopolitical and socio-economic context. With the drive towards disability inclusion, digitalisation, technological innovations, and inventions can play a significant role in universal design and reasonable accommodation for older people and populations with disabilities in the Global North and South, such forms one of the key pillars of accessible tourism and hospitality. In the context of the above and in response to the thoughtful need for new and sustained study of the developments, interrelationships, potentialities of the topic, and synergies, this edited book explores the trends, opportunities, challenges, and complexities of digitalisation and technology integration in the tourism and hospitality industry, as well as strategic shifts that will contribute to emerging research streams. The book comprises contributions that generate theoretical insights, empirical findings, and evidence-based recommendations by focusing on emerging and forecasted technologies used in the tourism and hospitality industry, such as blockchains, robots, Artificial Intelligence, Virtual Reality, big data, and analytics. The aim is to provide a better understanding of how disruptive technologies and digitalisation are currently being utilised and how they currently and potentially influence various stakeholder groups, as well as their future possibilities and impossibilities. The third volume in a three-volume set primarily covers how these new technologies impact consumers and employees of tourism-related services.

Creating Immersive Learning Experiences Through Virtual Reality (VR) Mazhar Hussain, Shaik, Nawaz Hakro, Ahmed, 2024-09-16. In the evolving educational environment, the search for engaging and effective learning experiences has led to the research and implementation of the latest technologies. Among them, virtual reality (VR) stands out as a transformative tool that promises to redefine the transmission and absorption of information. Bringing VR to education is not just a technical innovation but a pedagogical revolution. It represents a shift from passive learning to active learning, where students are not only observers but participants in their educational journey. *Creating Immersive Learning Experiences Through Virtual Reality (VR)* provides a comprehensive and up-to-date overview of the application of VR technologies in education, highlighting the gaps in current literature, future research goals, and facilitating interdisciplinary collaboration.

Negotiating Quality Concerns in Higher Education amidst Disruptions Felix Maringe,Otilia Chiramba,2025-06-02 Quality is at the heart of organisational development It is the one single reason organisations make progress or fail dismally when it is absent Disruptions can both be a catalyst for innovation and progress on one hand but when they are not well handled they can

cause organisations to spiral into catastrophe and oblivion This book is about how best to safeguard quality both during and beyond disruptions Based largely on research in South Africa the collection of essays will resonate with multiple higher education contexts and audiences Collectively the essays provide compelling reading for practitioners academics researchers and policy makers in higher education The book's central message is that while disruptions can expose our organisational weaknesses they create several opportunities to drive change and transformation The essays here capture the transition from crisis to high performance and ways in which universities can navigate such journeys ICEL2013-Proceedings of the 8th International Conference on e-Learning Eunice Ivala,2013-06-27
