Medicine Across Borders: Exploration of Grey Zones Susanne Lundin, Rui Liu, Elmi Muller, Anja Smith, 2023-11-15
Medicine Across Borders provides an interdisciplinary space to discuss the issue of substandard and falsified medical products. Scholars from social and medical sciences collaboratively contribute insight to improving safe medicine access. The circulation of medicines and medical products on the informal market is well known. Stakeholders including governmental agencies and biotechnic enterprises invest much effort in designing and implementing macrolevel interventions to limit the spread of such products. Nevertheless, there is a lack of knowledge and understanding of how informal markets function in everyday medicine access and use. This applies to professionals within and beyond academia, state governments as well as the general public. This book takes an international perspective examining the issue of substandard and falsified medical products cross nationally. Falsified and poor quality medicines are prevalent in low and middle income countries, but this book also includes research from high income countries arguing that they too have vulnerabilities and emphasising the need for vigilance even in well resourced and well regulated regimes. **Medicine Across Borders: Exploration of Grey Zones** provides an interdisciplinary space for a depth and diversity of material that spotlights some contemporary themes hindering access to essential medicines and driving the penetration of substandard and falsified medical products. The authors are drawn from a range of academic disciplines across the social and medical sciences presenting findings from data collected using an eclectic mix of methods and analysis. Surveys, ethnography, narrative case studies, statistical and thematic analysis are all deployed.

World Antimicrobial Awareness Week Vera Manageiro, Marwan Osman, Issmat I. Kassem, Dalal Hammoudi Halat, 2025-01-21
World Antimicrobial Week was established at the 68th World Health Assembly in 2015 and it takes place from the 18th to the 24th of November every year. Its key aim is to improve the awareness of antimicrobial resistance, highlighting the importance of education and communication. Antimicrobial resistance is caused by bacteria, viruses, fungi, and parasites not responding to current medicines such as antibiotics, antivirals, antifungals, and antiparasitics, leading to a higher risk of severe illness and death. This has a huge economic impact, leading to around five million deaths yearly, increased health expenditure, and ultimately inequalities. Several causes lead to antimicrobial resistance, varying from region to region. These include the misdiagnosis of certain diseases with the consequent misuse of antimicrobials, the overuse of antimicrobials in humans, animals, and crops, or the lack of hygiene, sanitation, and access to water. Due to these different causes, antimicrobial resistance needs a multisectoral response focusing on the specific circumstances of each country and region.

Critical Conversations on Knowledge, Curriculum and Epistemic Justice Margaret Blackie, Kathy Luckett, 2024-12-03
This edited collection celebrates the legacy of Suellen Shay, located in Higher Education Studies and Development in South Africa, the country where she lived and worked. The book has international reach as the authors engage in contemporary debates around how to think about knowledge in education, development work, in professional

education and more recently around the call to decolonise the curriculum Contributions draw on the social realist tradition in the sociology of education to discuss how curricula are or should be structured in order to make key forms of knowledge accessible to students The collection includes theoretical debates related to the field of higher education studies as well as chapters that analyse curricula and assessment in engineering the health professions tourism and music including the impact on curricula of interdisciplinary collaboration across different types of institution and knowledge This book will be important for scholars wanting to transform how universities and colleges think about curriculum design and practice It was originally published as a special issue of Teaching in Higher Education

China's Diplomacy in Eastern and Southern Africa Seifudein Adem,2016-05-23 In contemporary discourse on China Africa relations there are on the one

hand the Sino pessimists who see China as a giant vacuum cleaner sucking up Africa's resources in order to fuel its own rapid industrialization and destroying Africa's development potential in the process. On the other hand the Sino optimists see China as the ultimate savior of Africa capable of or willing to develop the continent. Between the two divergent schools of thought are those sitting on the fence for the time being the Sino pragmatists who are less sanguine for sure about what Africa would gain from China Africa relations but are nevertheless willing to reserve judgment until the dust settles. This book is innovative in two ways it introduces a regional approach to the study of China Africa relations by focusing on Eastern and Southern Africa and it puts forward a disciplinary framework disciplinary in both senses of that term for interrogating the burgeoning literature about China Africa relations by conceptualizing the three schools of thought mentioned above.

Natural History Societies and Civic Culture in Victorian Scotland Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era. Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress. In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress. Finnegan's study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument. Considerations of class religion and gender are explored illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies.
