Mountains Andrea Membretti,Sue Jean Taylor,Jess L. Delves,2023-01-30 This open access book presents multiple disciplinary perspectives on the challenges and opportunities for sustainable development in the South African mountain city of Phuthaditjhaba These challenges are embedded in the complex environmental socio cultural and political contexts of the region Established as the capital of the QwaQwa homeland under Grand Apartheid this city is now home to between 400 000 700 000 people but in many areas lacks formal infrastructure and services Each chapter of this volume addresses a different

aspect of the city's development and all take the UN Sustainable Development Goals as a common framework to guide their reflections on potential sustainable futures for Phuthaditjhaba. While the circumstances in Phuthaditjhaba will be familiar to many researchers of informal and growing cities in developing regions, the mountain setting of the city brings its own set of challenges and opportunities linked to the rugged and steep terrain, remoteness and natural resources. This book serves to showcase the diverse research taking place in this emerging mountain city and provide reflections on how a sustainable future can be ensured for its environment and inhabitants.

Urban Agriculture as Local Food Systems: Benefits, Challenges, and Ways Forward Tapan Kumar Nath, Sreetheran Maruthaveeran, 2025-09-30. Urban agriculture has emerged as a critical area of research due to the increasing pressures of population growth, rapid urbanization, climate change and land use changes on agricultural productivity and food security. The COVID-19 pandemic has further highlighted the vulnerabilities in global supply chains, leading to limited food availability and underscoring the need for resilient local food systems. LFS, which involve locally or regionally produced food sold directly to consumers, offer a promising approach to ensuring a steady food supply during crises. This transition towards more inclusive, resilient and sustainable food systems can enhance access to safe and healthy food, benefit farmers, boost local economies, reduce dependency on imported food, promote environmentally friendly production, conserve local biodiversity and mitigate climate change. Policymakers, planners and advocates are increasingly recognizing the broader benefits of LFS, including community building, diversified economies, civic engagement and climate resilience. Urban agriculture through community gardens and urban farms plays a significant role in achieving sustainable development goals such as reducing urban poverty, improving health and well-being, creating sustainable cities and communities, mitigating climate change, preserving life on land and fostering partnerships among stakeholders.
