Applications of Rational Functions

Overall Expectations:

- ❑ **POV.03** Solve problems involving polynomial and simple rational equations graphically and algebraically.

Specific Expectations:

- ❑ **PO3.05** Determine, through investigation using technology the connection between the real roots of a rational equation and the x-intercepts of the graph of the corresponding rational function, and describe this connection;
- ❑ **PO3.06** Solve simple rational equations in one variable algebraically, and verify solutions using technology;
- ❑ **PO3.07** Solve problems involving applications of polynomial and simple rational functions and equations.

Solving Rational Equations

How does this relate to concepts from the past?

- ❑ Solving a rational equation graphically is very similar to graphing a rational function and finding its x-intercept(s).
- ❑ Solving a rational equation algebraically is also similar in some ways to solving equations with fractions that you learned in Grade 9.

Solving an Equation Graphically

The real roots of a rational equation are the x-intercepts of the graph of the corresponding rational function.

Example

Solve $\frac{x-2}{x-3} = 0$
