Information in Instructions for Use of Consumer Products Ari Nissinen, 2005-03-11 The European Union has highlighted the
issue of environmentally sound use of products in the context of Integrated Product Policy IPP Accordingly consumers should
have easy access to understandable relevant and credible environmental information Information about product
characteristics is available in different forms and sources but in many cases relevant environmental information is not
available on the product itself The study described in this report was initiated in order to produce information on the state of
user instructions regarding environmental information User manuals of passenger cars and refrigerators were focused on
examining the advice which could diminish the harmful environmental effects of the use of these products Other studied
products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and
recyclable paper products The study raised many ideas about actions that could promote the status and eco development of
instructions for use *Customer-Oriented Quality Management in the Automotive Industry* Marit Breitfeld, 2005-02-28
Inhaltsangabe Abstract In times of severe competition it is of crucial importance to create a competitive advantage to
differentiate from the competitors and to sustain the business of the company This thesis intends to show that a customer
focused quality management is one way to create a sustainable competitive advantage Quality controls along the whole value
chain before during and after production leads to failure free products which save costs on the one hand and have thus a
positive influence on the company s revenue On the other hand failure free products that meet the customers expectations
lead to satisfied customers who build up a brand loyalty and conduct retention sales which have a positive influence on the
company s sales market share as well as the overall image Furthermore this thesis points out that it is important to listen to
the voice of the customers and get an insight in the customer s needs and wants To fulfil or even exceed their expectations
leads to customer satisfaction which is a key to success in today s business world In addition the customer demands in regard
of quality are growing continuously and new technologies are appearing on the markets on a regular basis Therefore the
producers are forced to keep to the latest technology developments and to get hold on the changing customer needs But even
without this external pressure quality improvement is justified from a cost point of view The applicability of a customer
oriented quality management is shown in the practical part of this thesis when the quality of the Saab models is analyzed
from the customer s perspective Due to the arguments outlined in this thesis it can be summarized that a quality
management with a focus on the needs of the customers in should become a core strategy of any company producing and
selling products in order to create customer satisfaction and sustain the business This thesis deals with the field of quality
management in the context of customer satisfaction To show the practical applicability of quality management this thesis is

looking at how quality management is conducted in the automotive industry as we compare the Initial Quality Study IQS from the market research institute J D Power with a survey that was internally conducted at the Saab Automobile AB Today s business environment creates a growing need for quality management Tougher competition leads to the demand for cost savings and higher
