Wartel, 2023-03-04 The Facilitated Self Help Guide describes a helping model for use by professionals during the challenging times. A professionally facilitated model utilizes technologies like secure videoconferencing to deliver a range of stress reduction and behavioral health strategies based on cognitive behavioral principles. Help is assessed by a professional facilitator who collaboratively adapts and designs strategies relying when possible on trying self administered self help first. The guide applies the model across a range of presenting issues encountered during these challenging times. Illustrated examples, flowcharts, and protocols are included. The guide has a detailed table of contents to aid navigation, a glossary, and a resource list for additional information and extensive referencing to document sources.
