All About Science: Philosophy, History, Sociology & Communication Lui Lam, Maria Burguete, 2014-10-15 There is a lot of confusion and misconception concerning science The nature and contents of science is an unsettled problem For example Thales of 2 600 years ago is recognized as the father of science but the word science was introduced only in the 14th century the definition of science is often avoided in books about philosophy of science This book aims to clear up all these confusions and present new developments in the philosophy history sociology and communication of science It also aims to showcase the achievement of China s top scholars in these areas The 18 chapters divided into five parts are written by prominent scholars including the Nobel laureate Robin Warren sociologist Harry Collins and physicist turned historian Dietrich Stauffer

Scimat Anthology: Histophysics, Art, Philosophy, Science Lui Lam, 2024-08-16 Scimat science of human is a new multidiscipline proposed by Lui Lam in 2007 Scimat treats all studies on human as a unified enterprise In terms of content Scimat Humanities Social Science Medical Science Scimat advocates the use of humanities science synthesis in understanding humans and collaboration between the humanists and natural scientists The ultimate aim of Scimat is to better humanity by bettering the humanities It has done so in the study of history art philosophy and science giving rise to some interesting and important results such as the appearance of a new discipline called Histophysics physics of history a new interpretation of art s origin and nature a better understanding of the differences between the philosophies of the West and East and a rigorous definition of science Scimat Anthology collects 27 original articles in the humanities published or unpublished from 2000 to 2024 with 26 by the founder of Scimat ending with an in depth analysis of Stephen Hawking and his legacy Readership ranges from high school students and laypeople to professors of all disciplines who are interested in what the humanities and science are about as well as new ideas in bridging them *Humanities, Science, Scimat: From Two Cultures To Bettering Humanity* Lui Lam, 2024-04-22 The humanities and social science are the disciplines that study human which are essential in helping us to understand ourselves and others and the world around us Since science is the study of everything in the universe and human is a material system consisting of the same atoms that make up other nonhuman systems humanities are part of science Thus understanding correctly what science is about will be helpful in making progress in the humanities To patch up the gap between the two cultures derived from these two branches of knowledge the best way is to recognize their common root in science and work through humanities science synthesis as advocated by Scimat the new multidiscipline proposed by the author in 2007 Furthermore raising the scientific level of the humanities which include decision making will help to make the world better Humanities Science Scimat details these issues consisting of three parts Part I is about Scimat and the new humanities history philosophy art Part II is on the origin and nature of science new insights on the life and works of selected scientists some thoughts on science communication popularization and case examples of science innovation all from the Scimat perspective While Parts I and II are short essays with no references with

rare exceptions Part III are longer articles with full references that supplement Parts I and II Each essay article starts with a color picture They are all easy to read nothing technical In short this book contains the basic knowledge about the humanities and science that everyone should know The aimed readership is anyone from high school students and laypeople to the professors who are interested in what the humanities and science are about and how we can work together to achieve a better humanity **Marketing Theory: Philosophy of Science Perspectives** Ronald F. Starring the Text Alan G. Gross,2006 *Starring the Text* The Place of Rhetoric in Science Studies firmly establishes the rhetorical analysis of science as a respected field of study Alan G Gross one of rhetoric's foremost authorities summarizes the state of the field and demonstrates the role of rhetorical analysis in the sciences He documents the limits of such analyses with examples from biology and physics explores their range of application and sheds light on the tangled relationships between science and society In this deep revision of his important *Rhetoric of Science* Gross examines how rhetorical analyses have a wide range of application effectively exploring the generation spread certification and closure that characterize scientific knowledge Gross anchors his position in philosophical rather than in rhetorical arguments and maintains there is rhetorical criticism from which the sciences cannot be excluded Gross employs a variety of case studies and examples to assess the limits of the rhetorical analysis of science For example in examining avian taxonomy he demonstrates that both taxonomical and evolutionary species are the product of rhetorical interactions A review of Newton's two formulations of optical research illustrates that their only significant difference is rhetorical a difference in patterns of style arrangement and argument Gross also explores the range of rhetorical analysis in his consideration of the evolution of evolution of Darwin's notebooks In his analysis of science and society he explains the limits of citizen action in executive judicial and legislative democratic realms in the struggle to prevent ameliorate and provide adequate compensation for occupational disease By using philosophical historical and psychological perspectives Gross concludes rhetorical analysis can also supplement other viewpoints in resolving intellectual problems *Starring the Text* which includes fourteen illustrations is an updated readable study geared to rhetoricians historians philosophers and sociologists interested in science The volume effectively demonstrates that the rhetoric of science is a natural extension of rhetorical theory and criticism
