What Is Cool?

No one can truly understand the sensation of jumping directly onto a turtle, but this is just one of many characteristics bestowed upon the main character in the book *Super Plumber Guy*. The book depicts a brightly lit world of wonder, fungi, and amphibians in varying biomes. While the main character, Mr. Plumber, is depicted as an everyman, his distinct look, style, and behaviors as described in the book show that he is anything but.

Mr. Plumber was originally written as something of an everyday character that the reader could embody. He has no true personality, nor does he have a voice, often allowing secondary characters around him to fill in the gaps. The reader does know that he wears a brightly colored hat, jumps high, and enjoys mushrooms. These are humble characteristics that bring out the humanity of the character. Most people are not a list of unique characteristics but a mosaic of smaller idiosyncrasies.

Super Plumber Guy remains a popular read containing a human character that many might consider boring or free of personality. However, Mr. Plumber is an exceedingly human character who acts as a blank slate for the reader. Diving deeper into other characters and their interactions with him may glean further insight into Mr. Plumber's motivations and inner psychology.

Analytical Essay on the Faculties of the Soul Charles Bonnet, 2022 In the course of the eighteenth century understanding human cognitive life came to be construed as something to be explored in terms of the physiology of the sensory organs the nerves and the brain a form of naturalization that effectively moved cognition out of the realm of philosophy as it had traditionally been understood Bonnet's *Analytical Essay on the Faculties of the Soul* was at the forefront of these developments and this is its first English translation Drawing on his earlier work in natural history he was the leading entomologist of his era he approaches problems of the nature of the mind via the physiology and anatomy of the brain and sensory systems His approach is one of reverse engineering starting from an organic statue without faculties and investigating how it would need to be modified to produce a human being Bonnet takes up a position that cuts across the standard understanding of the period as a clash between materialism and dualism While his approach was rigorously naturalistic and physiological this did not lead him to reject the notion of a soul Instead he argues that in order to make sense of their sensory abilities we need to attribute a soul to animals as well as human beings At the same time he argues that if personal immortality is to be possible it can be conceived along the lines of insect metamorphosis which shows how different biological forms can harbour a single identity dust jacket **Geological Survey Professional Paper** Geological Survey
