Analyzing Computer Systems Performance With Perl Pdq:

Analyzing Computer System Performance with Perl::PDQ Neil J. Gunther, 2009-03-22 Makes performance analysis and queueing theory concepts simple to understand and available to anyone with a background in high school algebra Presents the practical application of these concepts in the context of modern distributed computer system designs Packed with helpful examples that are based on the author's experience analyzing the performance of large scale systems over the past 20 years *Analyzing Computer System Performance with Perl* Neil J. Gunther, 2010-11-05 Analyzing computer systems performance is a tedious and recurring task of system administrators programmers and project managers This work makes this difficult subject understandable executable and manageable *Analyzing Computer System Performance with Perl::PDQ* Neil J. Gunther, 2011-07-30 To solve performance problems in modern computing infrastructures often comprising thousands of servers running hundreds of applications spanning multiple tiers you need tools that go beyond mere reporting You need tools that enable performance analysis of application workflow across the entire enterprise That's what PDQ Pretty Damn Quick provides PDQ is an open source performance analyzer based on the paradigm of queues Queues are ubiquitous in every computing environment as buffers and since any application architecture can be represented as a circuit of queueing delays PDQ is a natural fit for analyzing system performance Building on the success of the first edition this considerably expanded second edition now comprises four parts Part I contains the foundational concepts as well as a new first chapter that explains the central role of queues in successful performance analysis Part II provides the basics of queueing theory in a highly intelligible style for the non mathematician little more than high school algebra being required Part III presents many practical examples of how PDQ can be applied The PDQ manual has been relegated to an appendix in Part IV along with solutions to the exercises contained in each chapter Throughout the Perl code listings have been newly formatted to improve readability The PDQ code and updates to the PDQ manual are available from the author's web site at www.perfdynamics.com

Knowledge Engineering and Management Fuchun Sun, Tianrui Li, Hongbo Li, 2013-07-24 These proceedings present technical papers selected from the 2012 International Conference on Intelligent Systems and Knowledge Engineering ISKE 2012 held on December 15-17 in Beijing The aim of this conference is to bring together experts from different fields of expertise to discuss the state of the art in Intelligent Systems and Knowledge Engineering and to present new findings and perspectives on future developments The

proceedings introduce current scientific and technical advances in the fields of artificial intelligence machine learning pattern recognition data mining knowledge engineering information retrieval information theory knowledge based systems knowledge representation and reasoning multi agent systems and natural language processing etc Furthermore they include papers on new intelligent computing paradigms which combine new computing methodologies e g cloud computing service computing and pervasive computing with traditional intelligent methods By presenting new methodologies and practices the proceedings will benefit both researchers and practitioners who want to utilize intelligent methods in their specific fields Dr Fuchun Sun is a professor at the Department of Computer Science Technology Tsinghua University China Dr Tianrui Li is a professor at the School of Information Science Technology Southwest Jiaotong University Chengdu China Dr Hongbo Li also works at the Department of Computer Science Technology Tsinghua University China

Programming Multicore and Many-core Computing Systems Sabri Pllana, Fatos Xhafa, 2017-02-06 Programming multi core and many core computing systems Sabri Pllana Linnaeus University Sweden Fatos Xhafa Technical University of Catalonia Spain Provides state of the art methods for programming multi core and many core systems The book comprises a selection of twenty two chapters covering fundamental techniques and algorithms programming approaches methodologies and frameworks scheduling and management testing and evaluation methodologies and case studies for programming multi core and many core systems Program development for multi core processors especially for heterogeneous multi core processors is significantly more complex than for single core processors However programmers have been traditionally trained for the development of sequential programs and only a small percentage of them have experience with parallel programming In the past only a relatively small group of programmers interested in High Performance Computing HPC was concerned with the parallel programming issues but the situation has changed dramatically with the appearance of multi core processors on commonly used computing systems It is expected that with the pervasiveness of multi core processors parallel programming will become mainstream The pervasiveness of multi core processors affects a large spectrum of systems from embedded and general purpose to high end computing systems This book assists programmers in mastering the efficient programming of multi core systems which is of paramount importance for the software intensive industry towards a more effective product development cycle Key features Lessons challenges and roadmaps ahead Contains real world examples and case studies Helps programmers in mastering the efficient programming of multi core and many core systems The book serves as a reference for a larger audience of practitioners young researchers and graduate level students A basic level of programming knowledge is required to use this book

Arabnia, Leonidas Deligiannidis, Farzan Shenavarmasouleh, Soheyla Amirian, Farid Ghareh Mohammadi, 2025-09-22 This CCIS book constitutes selected papers accepted in the Research Tracks on Computational Science Computational Intelligence and Computational Biology of the 11th International Conference on Computational Science and Computational Intelligence CSCI 2024 which took place in Las Vegas NV USA during December 11 13 2024 The 35 full papers included in this book were carefully reviewed and selected from a total of 180 submissions They were organized in topical sections on computational science and applications artificial intelligence and applications scientific computing and HPC health informatics and computational biology and computational science and computational intelligence Guerrilla Capacity Planning Neil J. Gunther, 2007-01-17 In these days of shortened fiscal horizons and contracted time to market schedules traditional approaches to capacity planning are often seen by management as tending to inflate their production schedules Rather than giving up in the face of this kind of relentless pressure to get things done faster Guerrilla Capacity Planning facilitates rapid forecasting of capacity requirements based on the opportunistic use of whatever performance data and tools are available in such a way that management insight is expanded but their schedules are not A key Guerrilla concept is tactical planning whereby short range planning questions and projects are brought up in team meetings such that management is compelled to know the answer and therefore buys into capacity planning without recognizing it as such Once you have your foot in the door capacity planning methods can be refined in an iterative cycle of improvement called The Wheel of Capacity Planning Another unique Guerrilla tool is Virtual Load Testing based on Dr Gunther's Universal Law of Computational Scaling which provides a highly cost effective method for assessing application scalability Building a National Distributed E-Infrastructure -- PL-Grid Marian Bubak, Tomasz Szepieniec, Kazimierz Wiatr, 2012-03-02 This book describes scientific results obtained by project partners and outcomes of research and development activities carried out within the Polish Infrastructure for Information Science Support in the European Research Space PL Grid PL Grid 2011
