Willard Director of Center for Safe and Responsible Internet Use Archaeology of the Ionian Sea Christina Souyoudzoglou-Haywood, Christina Papoulia, 2021-12-22 Presents a thematic collection of papers dealing with the Stone Age and Bronze Age archaeology of the Ionian Sea situated off the south western Balkan peninsula. It is based on an international conference held in Athens Greece in January 2020. The eastern Ionian occupies a geographically complex area which since the Pleistocene has undergone significant alterations due to tectonic activity and sea level fluctuations. This dynamic environment where islands, mainland and sea intertwined to present different landscapes and seascapes to the human communities exploring the region at different times in the past provides an ideal setting for their study from a diachronic perspective. This book deals thematically with the processes of circulation of people, materials, artefacts and ideas by examining patterns of settlement, burial and multi-layered interconnections between the different communities via land and sea. It investigates aspects of regional and interregional communication, isolation, collective memory and the creation of distinct identities within and between different cultural and social groups. It focuses on the islands of the Central Ionian Sea offering new data from excavations and surveys on Zakynthos, Kefalonia, Ithaki and the smaller islands of the Inner Ionian Archipelago between Lefkada and Akarnania. The cultural interchange between the islands and the continental coasts is reflected in the volume with the addition of chapters dealing with contemporary sites in west Greece and southeast Italy. The Ionian often regarded as at the fringes of the Aegean, the Balkan and the central Mediterranean archaeological discourse has lately offered new and exciting data that not only enrich but also alter our perceptions of mobility, settlement and interaction. The collection of papers in this book enhances theoretical discussions by offering a geographically and culturally comparative approach ranging from the earliest Palaeolithic evidence of human presence in the region to the end of the Bronze Age.

Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation

U-Turn Teaching Rich Allen, Jenn Currie, 2012-09-04 Help middle schoolers engage in the classroom before it s too late The middle school years mark a critical point in a child s educational journey For many educators these years are the last chance to put in place strong positive learning patterns U Turn Teaching is founded on Rich Allen s Green Light education strategies in which every activity is designed to proactively support learning This book builds on what researchers have discovered about how the adolescent brain learns best and shows how those discoveries directly relate to effective classroom teaching Now you can engage all students even unmotivated ones and help them make a U turn by applying these four principles of brain based learning Build and maintain trust Create a collaborative community Take a TEAMing approach Prime the positive environment U Turn Teaching demonstrates how to realistically accomplish these four principles in your classroom When educators are able to embed positive efficient and effective patterns of learning in the middle years students are far more likely to succeed in high school and beyond

Understanding Invasive Species in the Galapagos Islands María de Lourdes Torres, Carlos F. Mena, 2018-02-15 This book investigates the introduction of invasive species and their

behavior in oceanic islands How can we define invasive species What is their history How did they come to dominate and transform ecosystems These are relevant questions when trying to understand the behavior of invasive species primarily in fragile ecosystems such as islands and to understand the biological ecological social and economic impacts of invasions We chose the Galapagos Islands a place well known to be unique in the study of evolution as a laboratory to analyze the interactions between invasive and endemic species to understand the makeup of the ecosystems emerging after invasions have occurred to describe the relationships of invasives with the people that live in these islands and to try to develop comprehensive analyses on this topic from multi scalar and multi disciplinary points of view For a long time the discussion has been about how proper management of the species could achieve two main goals the eradication of the species to recover affected ecosystems and the conservation of endemic species The discussion has taken on other nuances including the suggestion that an invasive species when it is already adapted to an ecosystem forms an integral part of it and thus eradication would in itself go against conservation On the other hand some invasive species are not only part of the biological compound of the island ecosystems but they also form part of the social and cultural history of the inhabited islands Some of these identified by the local inhabitants are species of real or potential economic value *Skifter ,1998 The Fortnightly Review ,1886*
