Quantum Physics Dillard W. Faries, 2017-11-07 Science and faith have had a long intertwined history The relationship has run the gamut from a total disconnect to an adversarial battleground where proponents of each claim total victory However if God created the physical world and remains active in the physical world we cannot ignore the interaction nor can we assume or expect a world of conflict While nineteenth century physics brought classical physics which quite reasonably divorced God and nature to a culmination twentieth century physics especially quantum physics has opened a new realm of possible interactions Even though one can reasonably say that no one understands quantum physics the fruits of the discipline overflow the cornucopia People of faith can share the feast and people of science are welcome at the table of faith
