Wachira, Patrick, Keengwe, Jared, 2019-11-29 Online learning has become an important vehicle for teacher and student learning. When well designed online environments can be very powerful in a way that is consistent with the goals of inquiry, experimentation, investigation, reasoning, and problem solving so learners can develop a deep understanding of a subject. Some subjects however are not well suited for this type of learning due to the need for small group collaborating and hands on problem solving. The Handbook of Research on Online Pedagogical Models for Mathematics Teacher Education provides innovative insights into technology applications and tools used in teaching mathematics online and provides examples of online learning environments and platforms that are suitable for meeting math education goals of inquiry, investigation, reasoning, and problem solving. The content within this publication examines access to education, professional development, and web based learning. It is designed for teachers, curriculum developers, instructional designers, educational software developers, IT consultants, higher education faculty, policymakers, administrators, researchers, academicians, and students.

Intermediate Algebra John Tobey, Jeffrey Slater, 2005 A worktext format for basic college math or arithmetic courses including lecture based, self paced and modular classes. John Tobey and Jeff Slater are experienced developmental math authors and active classroom teachers. This building block organization is a practical approach to basic math skill development that makes it easier for students to understand each topic, gaining confidence as they move through each section. Knowing students crave feedback, Tobey has enhanced the new edition with a How am I Doing guide to math success. The combination of continual reinforcement of basic skill development, ongoing feedback, and a fine balance of exercises makes the fifth edition of Tobey Slater Intermediate Algebra even more practical and accessible. *Finite Mathematics and Calculus with Applications*
