We Could Not Fail Richard Paul,Steven Moss,2015-05-01 The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery discrimination and violence against African Americans Presidents John F Kennedy and Lyndon Johnson utilized the space program as an agent for social change using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty We Could Not Fail tells the inspiring largely unknown story of how shooting for the stars helped to overcome segregation on earth Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights They recount how these technicians mathematicians engineers and an astronaut candidate surmounted barriers to move in some cases literally from the cotton fields to the launching pad The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges patenting new inventions holding elective office and reviving and governing defunct towns Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration We Could Not Fail demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement Current Catalog National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 **The Human Radiation Experiments** Advisory Committee on Human Radiation Experiments,1996-06-06 This book describes in fascinating detail the variety of experiments

sponsored by the U S government in which human subjects were exposed to radiation often without their knowledge or consent Based on a review of hundreds of thousands of heretofore unavailable or classified documents this Report tells a gripping story of the intricate relationship between science and the state Under the thick veil of government secrecy researchers conducted experiments that ranged from the mundane to such egregious violations as administering radioactive tracers to mentally retarded teenagers injecting plutonium into hospital patients and intentionally releasing radiation into the environment This volume concludes with a discussion of the Committee s key findings and guidelines for changes in institutional review boards ethics rules and policies and balancing national security interests with individual rights Ethicists public health professionals and those interested in the history of medicine and Cold War history will be intrigued by the findings of this landmark report
