14 November Physical Science Paper 1 Memo:

NASA Technical Memorandum ,1994 An Ocean in Common Gary E. Weir,2001 Through two victorious world conflicts and a Cold War the U S Navy and American ocean scientists drew ever closer converting an early marriage of necessity into a relationship of astonishing achievement Beginning in 1919 Gary Weir s An Ocean in Common traces the first forty two years of their joint quest to understand each other and the deep ocean Early in the twentieth century American naval officers questioned the tactical and strategic significance of applied ocean science demonstrating the gap between this kind of knowledge and that deemed critical to naval warfare At the same time scientists studying the ocean labored in their inadequately funded discreet disciplines seemingly content to keep naval warfare at arm s length German U boat success in World War I changed these views fundamentally bringing ocean science insights to an increasing number of naval objectives Driven primarily by anti submarine priorities the physics chemistry and geology of the ocean more than its biology became the early focus of American ocean studies The World War II experience solidified the Navy s relationship with ocean scientists and the years after 1945 found the American military investing heavily in both applied and basic research Today oceanography is a permanent resident on the bridge of American fighting ships and the Navy continues to provide much of the impetus and funding for fundamental research in both naval and civilian laboratories In An Ocean in Common Gary Weir focuses on the compelling motives and carefully engineered course that brought scientists and naval officers together across a considerable cultural divide to achieve a more comprehensive understanding of one another and the world ocean Weir details how this alliance laid the powerful multidisciplinary foundation for long range ocean communication and surveillance modern submarine warfare deep submergence and the emergence of oceanography and ocean engineering as independent and vital fields of study **NOAA Technical Memorandum EDS BS.** ,1967 **Federal Register** ,1995-08 *British University Observatories, 1772-1939* Roger Hutchins,2008 This is the first full history of the six university observatories that undertook research before World War II Oxford Dunsink Cambridge Durham Glasgow and London and their struggle to evolve in the middle ground between the royal or government observatories and those of the Grand Amateurs The book will intrigue anyone interested in the history of astronomy of telescopes of patronage networks of scientific institutions and of the history of universities Science, Cold War and the American State Allan A. Needell,2013-02-01 This book illuminates how Berkner became a model that produced the scientist advisor policymaker that helped build post war America It does so by providing a detailed account of the personal and professional beliefs of one of the most influential figures in the American scientific community a figure that helped define the political and social climates that existed in the United States during the Cold War **James B. Conant** James G. Hershberg,1995 James B Conant 1893 1978 was one of the giants of the American establishment in the twentieth century President of Harvard University from 1933 to 1953 he was also a scientist who led the US government s effort to develop weapons of mass destruction and his story mirrors the transition of the United States from

isolationism to global superpower at the dawn of the nuclear age This splendid portrait of Conant illuminates the life of a pivotal figure in the making of US nuclear scientific educational and foreign policy for almost half a century But the book is much more it is not only an insightful narration of Conant's life it is also a brilliant and important account of the making of the nuclear age a chronicle that contains much that is new The Washington Post The bomb would be as much Conant's as it was anyone's in government His inner response to that burden of responsibility has long been obscured but it is illumined here This is a model of historiography that is evocative reading The New York Times Book Review Vibrantly written and compelling it breaches Conant's shield of public discretion in masterly fashion

Notices of Changes in Classification, Distribution and Availability, 1978 **Biotech** Eric J. Vettel, 2006

The seemingly unlimited reach of powerful biotechnologies and the attendant growth of the multibillion dollar industry have raised difficult questions about the scientific discoveries political assumptions and cultural patterns that gave rise to for profit biological research Given such extraordinary stakes a history of the commercial biotechnology industry must inquire far beyond the predictable attention to scientists discovery and corporate sales It must pursue how something so complex as the biotechnology industry was born poised to become both a vanguard for contemporary world capitalism and a focal point for polemic ethical debate In Biotech Eric J Vettel chronicles the story behind genetic engineering recombinant DNA cloning and stem cell research It is a story about the meteoric rise of government support for scientific research during the Cold War about activists and student protesters in the Vietnam era pressing for a new purpose in science about politicians creating policy that alters the course of science and also about the release of powerful entrepreneurial energies in universities and in venture capital that few realized existed Most of all it is a story about people not just biologists but also followers and opponents who knew nothing about the biological sciences yet

cared deeply about how biological research was done and how the resulting knowledge was used Vettel weaves together these stories to illustrate how the biotechnology industry was born in the San Francisco Bay area examining the anomalies ironies and paradoxes that contributed to its rise Culled from oral histories university records and private corporate archives including Cetus the world's first biotechnology company this compelling history shows how a cultural and political revolution in the 1960s resulted in a new scientific order the practical application of biological knowledge supported by private investors expecting profitable returns eclipsed basic research supported by government agencies [To See the Unseen](#)

Andrew J. Butrica, 1996 A comprehensive illuminating history of this little understood but surprisingly significant scientific activity Quite rigorous systematic in its methodology the book explores the development of the radar astronomy specialty in the larger community of scientists More than just discussing the development of this field however the author uses planetary radar astronomy as a vehicle for understanding larger issues relative to the planning execution of big science by the Fed government Sources interviews technical essay abbreviations index [On Mars](#) Edward Clinton Ezell, Linda Neuman Ezell, 1984 **On Mars** Edward Clinton Ezell, Linda Neuman Ezell, 2013-02-19 Although it was only designed for a ninety day surface mission the Viking 1 lander ultimately transmitted science messages to Earth for seven years This authoritative history chronicles the remarkable achievements of the Viking program during its first three decades Commissioned by NASA it recounts the events surrounding the first planetary landing on Earth's closest neighbor and the first on site search for evidence of extraterrestrial life It also portrays a human drama in which thousands of professionals from government industry and academia joined together to accomplish the seemingly impossible This history begins with a survey of the qualities that make the surface and atmosphere of Mars prime targets for scientific investigation A retrospective of NASA's Mariner program follows detailing the series of robotic interplanetary probes that led to the initiation of the Viking program in 1968 The authors trace the ensuing technological developments including the first lander vehicles and orbiter They also profile the cooperation of managerial technical and scientific teams during the mission's data gathering and analysis phases The final chapters outline the scientific results of the Viking investigations examine some of the unresolved questions and consider possible future explorations Dozens of photos taken by Viking cameras illuminate the text [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.), 1968 **Current Catalog** National Library of Medicine (U.S.), 1970 First multi year cumulation covers six years 1965-70 **Pierre Koenig** Neil Jackson, 2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig a key figure of the Los Angeles Modernist movement In this remarkable and gorgeously illustrated book Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig who Time magazine said lived long enough to become cool twice From the influences of Koenig's youth in San Francisco and his military service during World War II to the Case Study Houses and his later award laden years Jackson's study plots the evolution of Koenig's oeuvre against the backdrop of Los Angeles a city that both shaped and

was shaped by his architecture The book is anchored by Jackson s exciting discoveries in Koenig s archive at the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination of Koenig s Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles **Research in Education** ,1969

Recollections of "Tucson Operations" M.A. Gordon,2006-03-30 A personal account of the evolution of millimeter wave astronomy at the US National Radio Astronomy Observatory The author recounts the behind the scenes activities of the staff from the beginnings at Kitt Peak to the closing of the Tucson offices **From Medical Chemistry to Biochemistry** Robert E. Kohler,1982-05-31 This penetrating case study of institution building and entrepreneurship in science shows how a minor medical speciality evolved into a large and powerful academic discipline Drawing extensively on little used archival sources the author analyses in detail how biomedical science became a central part of medical training and practice The book shows how biochemistry was defined as a distinct discipline by the programmatic vision of individual biochemists and of patrons and competitors in related disciplines It shows how discipline builders used research programmes as strategies that they adapted to the opportunities offered by changing educational markets and national medical reform movements in the United States Britain and Germany The author argues that the priorities and styles of various departments and schools of biochemistry reflect systematic social relationships between that discipline and biology chemistry and medicine Science is shaped by its service roles in particular local contexts This is the central theme The author s view of the political economy of modern science will be of interest to historians and social scientists scientific and medical practitioners and anyone interested in the ecology of knowledge in scientific institutions and professions
