Advances In The History Of Mathematics Education Alexander Karp, 2022-06-20 This book is a collection of scholarly studies in the history of mathematics education very abbreviated versions of which were presented at the ICMI Congress in 2021 The book discusses issues in education in Brazil and Belgium in Poland and Spain in Russia and the United States Probably the main factor that unifies the chapters of the book is their attention to key moments in the formation of the field of mathematics education Topics discussed in the book include the formation and development of mathematics education for women the role of the research mathematician in the formation of standards for writing textbooks the formation of curricula and the most active figures in this formation during the New Math period the formation of certain distinctive features of curricula in Poland the formation of the views of David Eugene Smith and the influence of European mathematics education on him the formation of the American mathematics community and the creation of such forms of student assessment as entrance exams to higher educational institutions The book is of interest not only to historians of mathematics education but also to wide segments of specialists in other areas of mathematics education

Making Space for Active Learning Anne C. Martin, Ellen Schwartz, 2015-04-28 This powerful collection will inspire new and veteran teachers to make space for children's interests for teaching as relational and intellectual work and for new insights and ideas The authors introduce the Prospect Center's Descriptive Review of Practice a collaborative inquiry process that provides an opportunity for teachers to examine their practice and gain new perspectives from other participants The contributors to this volume respond to each child's modes of thinking as they develop curriculum or find wiggle room in curricula they are given By demonstrating how it is possible to pursue careful knowledge of craft this book offers ways of teaching that allow for continuing growth and change

Book Features An inquiry methodology that assists teachers to reflect on the classroom and develop curriculum that responds to children's interests and needs Specific examples of a variety of sources teachers can draw on and think about to improve practice A method of data collection that can inform practice while allowing for the unevenness messiness and essential humanness of teaching and learning *Making Space for Active Learning* is a collection that stands alone and gets to the heart of what we mean by learning and teaching Each contribution reminded me of how much I miss being in the classroom and how much we're missing in current so called school reform discourse Keep this book handy A chapter at a time will restore some needed sanity about what's important Deborah Meier author and education activist This book is a moving and powerful collection of teachers' work that holds the possibility of inspiring and changing new teachers' practice Kathy Schultz Dean and Professor School of Education Mills College This book will add significantly to the expanding and important literature about The Prospect Processes which were developed over many years at the Prospect School and Center in Vermont The chapters all by experienced educators profit from the back and forth between inquiry and stories of classroom life each informing the other Brenda S Engel associate professor retired Lesley University

Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It s hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Why Nationalism Yael Tamir, 2020-11-03 Why nationalism is a permanent political force and how it can be harnessed once again for liberal ends Populist politicians exploit nationalism for authoritarian chauvinistic racist and xenophobic purposes reinforcing the view that it is fundamentally reactionary and antidemocratic The author makes a passionate argument for a very different kind of nationalism one that revives its participatory creative and egalitarian virtues answers many of the problems caused by neoliberalism and hyperglobalism and is essential to democracy at its best The Connecticut School Journal , 1874
