Globalization and Labour in the Twenty-First Century Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work

Global Maritime Military Strategy, 1980-2023 Keitaro Ushirogata, 2025-03-17 This open access book is an ambitious study about how to use comparative methods to analyze contemporary military strategy in the maritime domain Based on the three strategic concepts of area denial sea control and power projection this book analyzes the intensive conventional capabilities of six major powers military strategies These include the United States the United Kingdom and Japan the so called sea powers and Russia China and India which are usually recognized as land powers Through the analysis this book aims to accomplish the following three main objectives 1 To reconsider the basic concepts of maritime military strategic studies which have not changed for almost one hundred years and to propose a new analytical framework based on the following three elements as well as verifying the appropriateness of this framework a The capability with which a country can deny military threat against its territory through the maritime domain within the geographic theater i.e. roughly one thousand to two thousand kilometers from its coastline area denial b The capability with which a country can obtain military superiority or disrupt an adversary's military superiority in the open ocean sea control c The capability with which a country can project military power from the maritime domain to other countries territories accomplishing military strategic objectives power projection 2 To verify the six major powers long term military strategic objectives for example whether the country aims to enhance its power in the maritime domain or to project its military power to the other countries areas beyond the maritime domain to do this by analyzing each country's force

building directions In addition this book assesses each country s capability for high intensive conflict and unravels each security military strategic objectives 3 By examining the strategic objectives of major powers this book may contribute to establishing Japan s future defense strategy *Federal Register* ,2013-05 **Target NTSE Class 10 Stage 1 & 2 Solved Papers (2015 - 21) + 5 Mock Tests (MAT + SAT) 7th Edition** Disha Experts,2021-08-01 Israeli National Security Charles David Freilich,2018 The most comprehensive study to date of Israel s national security It combines an exhaustive analysis of the military diplomatic demographic and societal challenges Israel faces with the responses it has developed to present a detailed proposal for an overall new national security strategy the first such Israeli strategy ever published

Management Chris Brewster, Wolfgang Mayrhofer, Elaine Farndale, 2018-04-27 This second updated and extended edition of the Handbook of Research on Comparative Human Resource Management draws on the work of many of the world's leading researchers in the field to present the state of the art to scholars, students and practitioners. The Handbook provides a detailed focus on the theoretical underpinnings of Comparative HRM, on comparative studies of specific areas of HRM practice and on the unique features of HRM in all the main regions of the world. *Working-Class Utopias* Robert M. Fogelson, 2022-10-18 One of the nation's foremost urban historians traces the history of cooperative housing in New York City from the 1920s through the 1970s. As World War II ended and Americans turned their attention to problems at home, union leaders and other prominent New Yorkers came to believe that cooperative housing would solve the city's century-old problem of providing decent housing at a reasonable cost for working-class families. *Working-Class Utopias* tells the story of this ambitious movement from the construction of the Amalgamated Houses after World War I to the building of Co-op City, the world's largest housing cooperative, four decades later. Robert Fogelson brings to life a tumultuous era in the life of New York, drawing on a wealth of archival materials such as community newspapers, legal records and personal and institutional papers. In the early 1950s, a consortium of labor unions founded the United Housing Foundation under the visionary leadership of Abraham E. Kazan, who was supported by Nelson A. Rockefeller, Robert F. Wagner Jr. and Robert Moses. With the help of the state, which provided below-market-rate mortgages, and the city, which granted tax abatements, Kazan's group built large-scale cooperatives in every borough except Staten Island. Then came Co-op City, built in the Bronx in the 1960s as a model for other cities but plagued by unforeseen fiscal problems, culminating in the longest and costliest rent strike in American history. Co-op City survived, but the United Housing Foundation did not, and neither did the cooperative housing movement. *Working-Class Utopias* is essential reading for anyone seeking to understand the housing problem that continues to plague New York and cities across the nation. *Toward a World-class Passenger Rail System in California* California Legislature. Senate. Committee on Transportation and Housing, 2014 **Congressional Record**, **Arab Dawn** Bessma Momani, 2015-11-26 In the West, news about the Middle East is dominated by an endless stream of reports and commentary about civil war, sectarian violence, religious extremism and economic stagnation. But do they tell the full story? For instance, who knew that university enrolment in the war-torn Palestinian territories exceeds that of Hong Kong, or that more than a third of Lebanese entrepreneurs are women? Change is on its way in the Middle East, argues Bessma Momani, and its cause is demographic. Today, one in five Arabs is between the ages of fifteen and twenty-four. Young, optimistic and increasingly cosmopolitan, their generation will shape the region's future. Drawing on interviews, surveys and other research conducted with young people in fifteen countries across the Arab world, Momani describes the passion for entrepreneurship, reform and equality among Arab youth. With insightful political analysis based on the latest statistics and first-hand accounts, *Arab Dawn* is an invigorating study of the Arab world and the transformative power of youth. **Global Social Policy** Kepa Artaraz, Liz

Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kapa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels

Eskom Sylvie Jaglin, Alain Dubresson, 2016-08-16 Africa s leading producer of electricity Eskom Holdings SOC Ltd is also a vertically integrated monopoly owned by the South African state This national champion was shaken in 2008 when it was obliged to introduce load shedding or rolling blackouts and again in late 2014 Trying to understand how and why one of the iconic pillars of South African state capitalism is now in distress the authors of this book argue that the so called electricity crisis is in fact a public monopoly crisis Moving beyond technical aspects they explore the relationship between state power and Eskom before during and after apartheid From this perspective they suggest that the current technical and financial troubles of this public utility are illustrative of the weakening of its technopolitical regime of how national institutions have governed Eskom s technological development and of the pursuit of political goals in the production of electrical power Without a clear industrial strategy during the 2000s Eskom became a powerful tool of Broad Black Economic Empowerment as well as a neopatrimonial system which generates profits captured by the ruling party As a result crisis in Eskom shakes the whole political edifice Inefficient and its finances increasingly under scrutiny this state owned enterprise s existence as a monopolistic public utility is regularly a subject of debate The authors discuss the ambivalent role of Eskom in the national energy transition policy and whether solutions point in the direction of de integrating this public monopoly and allowing its current technopolitical regime to enter a planned or natural decline **Inside U.S. Immigration Policy** Bryan

Warde, 2024-12-23 Inside U S Immigration Policy provides a comprehensive introduction to the development of U S immigration and immigration policies from the nation s colonial beginnings to the present day Written for students of social welfare social work public policy sociology and history the book develops a clear and historical framework for understanding

current controversies around immigration Bryan Warde offers a thoroughly researched account of immigration policies spanning 1882 to the present and calls upon theories and ideologies that explain conflicting views and shifting attitudes on immigrants and immigration The book's discussion is organized chronologically and each chapter supports students in developing the skills and knowledge to analyze and unpack the extent to which societal structures and values may oppress marginalize alienate create or enhance privilege and power in the context of immigration policies It also reveals the forms and mechanisms of oppression and discrimination and leads readers to consider the sociopolitical factors that shape social policy and the provision of services to marginalized populations Chapter summaries timelines and discussion questions throughout support learning and comprehension and encourage students to grasp the nuances and implications of this vastly important field of study This book is an excellent addition to a range of undergraduate and graduate courses on social welfare public policy social work sociology and history

Preventing Chemical Weapons Lijun Shang, Malcolm Dando, Michael Crowley, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

Chains of Finance Diane-Laure Arjaliès, Philip Grant, Iain Hardie, Donald A. MacKenzie, Ekaterina Svetlova, 2017 This book suggests that investment decisions cannot be understood by focusing on isolated investors Rather most of their money flows through a

chain a sequence of intermediaries that sit between savers and companies governments It argues that investment management is shaped by the opportunities and constraints that this chain creates National Security, Democracy, & Good Governance in Post-Military Rule Nigeria, Volume One Dr. Dan Mou, 2016-12-30 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the seventy one percent 71% of Nigerias population still living below poverty line This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness the worst civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use
