**The UK Regional-National Economic Problem** Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Arab Development Denied Ali Kadri, 2014-07-01 Arab Development Denied examines how over the last three decades the Arab world has undergone a process of developmental descent or de development As a result of defeat in wars the loss of security and sovereignty and even their own class proclivity the Arab ruling classes have been transformed

into fully compradorial classes that have relinquished autonomy over policy The neoliberal policies adopted since the early eighties are not developmental policies but the terms of surrender by which Arab resources human or otherwise are stifled or usurped In this book Ali Kadri attributes the Arab world s developmental failure to imperialist hegemony over oil and the rising role of financialisation which goes hand in hand with the wars of encroachment that strip the Arab world of its sovereignty and resources      **Village Housing** Nick Gallent,Iqbal Hamiduddin,Phoebe Stirling,Meiling Wu,2022-10-17

Village Housing explores the housing challenge faced by England s amenity villages rooted in post war counter urbanisation and a rising tide of investment demand for rural homes It tracks solutions to date and considers what further actions might be taken to increase the equity of housing outcomes and thereby support rural economies and alternate rural futures Examining past current and future intervention the book s authors analyse three major themes the interwar reliance on landowners to provide tied housing and post war diversification of responses to rising housing access difficulties including from the public and third sectors recent responses that are community led or rely on flexibilities in the planning system and actions that disrupt established production processes including self build low impact development and a re emergence of council provision These responses to the village housing challenge are set against a broader backdrop of structural constraint rooted in a planning land tax finance nexus and opportunities through reform to reduce that constraint Village Housing makes the case for planning land and tax reforms that can broaden the social inclusivity and diversity of villages supporting their economic function and allowing them to play their part in post carbon rural futures It aims to contribute greater understanding of the village housing problem framed by the wider cost crisis afflicting advanced economies and offer glimpses of alternative relationships with planning and land      China's International Relations and Harmonious World Astrid Nordin,2016-04-28 As scholars and publics look for alternatives to what is understood as a violent Western world order many claim that China can provide such an alternative through the Chinese dream of a harmonious world This book takes this claim seriously and examines its effects by tracing the notion across several contexts the policy documents and speeches that launched harmony as an official term under previous president Hu Jintao the academic literatures that asked what a harmonious world might look like the propaganda and mega events that aimed to illustrate it the online spoofing culture that is used to criticise and avoid harmonization and the incorporation of harmony into current president Xi Jinping s Chinese dream This book finds contemporary Chinese society and international relations saturated with harmony Yet rather than offering an alternative to problems in Western thought it counter intuitively argues that harmony has not taken place is not taking place and will not take place The argument unfolds as a contribution to wider debates on time space and multiplicity in world politics Offering analysis of the important but understudied concept of harmony Nordin provides new and creative insights into wider contemporary issues in Chinese politics society and scholarship The book also suggests a creative and novel methodology for studying foreign policy concepts more broadly drawing on critical thinkers in innovative ways and in a

new empirical context It will be of interest to students and scholars of IR Chinese foreign and security policy and IR theory
