Altman,2021-11-16 American Examples New Conversations about Religion Volume One is the first in a series of annual anthologies published in partnership with the Department of Religious Studies at The University of Alabama The American Examples initiative gathers scholars from around the world for a series of workshops designed to generate big questions about the study of religion in America Bypassing traditional white Protestant narratives in favor of new perspectives on belief social formation and identity American Examples fellows offer dynamic perspectives on American faith that challenge our understandings of both America and religion as categories In the first volume of this exciting academic project five topically

and methodologically diverse scholars vividly reimagine the potential applications of religious history The five chapters of this inaugural volume use case studies from America broadly conceived to ask larger theoretical questions that are of interest to scholars beyond the subfield of American religious history Prea Persaud's chapter explores the place of Hinduism among the creole religions of the Caribbean while Hannah Scheidt captures what atheist parents say to each other about value systems Travis Warren Cooper explains how the modernist church architecture of Columbus Indiana became central to that city's identity Samah Choudhury dissects how Muslim American comedians navigate Western ideas of knowledge and self to make their jokes and their own selves legible and Emily D Crews uses ethnographic fieldwork to read the female reproductive body among Nigerian Pentecostal congregations Editor Michael J Altman also provides a brief rich introduction assessing the state of the discipline of religious history and how the American Examples project can lead the field forward

Byzantine Greece: Microcosm of Empire? Archibald Dunn,2023-08-28 This volume offers a structured presentation of the progress of research into the internal history of a part of the Byzantine world Greece in the centuries before the multiple changes induced or accelerated by the Fourth Crusade Greece is a large area several Early and Middle Byzantine provinces with records archival literary archaeological architectural and art historical most of which are unequalled in terms of their density and range This creates opportunities for useful synthesis and for dialogue with those now engaged in the rewriting or writing of the inner history of Byzantium from Italy to the Caucasus who have been stimulated by or involved in the editing of archives and inscriptions including sigillographic and in the publication of monuments excavations and surveys for all of which the Greek space the *elladik kh ra* is a particular and fertile focus of activity as the conference showed Much of the material presented here can usually only be found in specialised publication and indeed much in Greek alone But properly contextualised this material about the Greek space deserves to be brought into the dialogues or debates at the heart of Byzantine Studies for instance about the Late Antique boom urban life the Dark Age economic change the nature of the Byzantine revival and of social socio economic and ethnic groups The studies here synthesise such research enabling the Greek space as a case study in the evolution of a significant region to the west of Constantinople to take its place more fully as a point of reference in such dialogues or debates Equally it provides frameworks for archaeologists dealing with Greece from Late Antiquity onwards and there are now many with which to engage and it makes available a rich source of comparative material for those studying the other regions of the Byzantine world whether historically or archaeologically in Southeastern Europe Italy or Turkey
