Generative Adversarial Networks for Image Generation Xudong Mao, Qing Li, 2021-02-17 Generative adversarial networks GANs were introduced by Ian Goodfellow and his co authors including Yoshua Bengio in 2014 and were referred to by Yann Lecun Facebook's AI research director as the most interesting idea in the last 10 years in ML. GANs' potential is huge because they can learn to mimic any distribution of data which means they can be taught to create worlds similar to our own in any domain: images, music, speech, prose. They are robot artists in a sense and their output is remarkable, poignant even. In 2018 Christie's sold a portrait that had been generated by a GAN for 432,000. Although image generation has been challenging, GAN image generation has proved to be very successful and impressive. However, there are two remaining challenges for GAN image generation: the quality of the generated image and the training stability. This book first provides an overview of GANs and then discusses the task of image generation and the details of GAN image generation. It also investigates a number of approaches to address the two remaining challenges for GAN image generation. Additionally, it explores three promising applications of GANs: image to image translation, unsupervised domain adaptation, and GANs for security. This book appeals to students and researchers who are interested in GANs, image generation, and general machine learning and computer vision. Wikipedia contributors, *Learning Rates of Electric Vehicles* Andreas Zerfuß, 2017-11-01 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economies of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short to mid term. Here the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by i) establishing experience curves and ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis. The analysis captures the situation in Germany between 2010 and 2016. **The**

New Millennium Serial Killer Bethan Trueman, Chris Clark, 2023-02-16 In March 2011 a major police investigation was opened in the search for missing Swindon local Sian O'Callaghan. When taxi driver Christopher Halliwell was arrested Detective Superintendent Stephen Fulcher didn't expect what happened next. After the body of another missing girl, Becky Godden Edwards, was uncovered, the police had two murders on their hands and one suspect, but how many more unsolved murders could Christopher Halliwell be responsible for? The hidden cache of around 60 pieces of women's clothing and accessories that he led police to suggests that the number could be much higher than the two murders he has been convicted of. In *The New Millennium Serial Killer*, former police intelligence officer Chris Clark and true crime podcast host Bethan
