2014 Grade 12 First Paper Mathematics Preparatory Memo:

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before *Brown v Board of Education* Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools [Resources in Education](#), 1988

An Age of Accountability John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

The Maslov Index in Symplectic Banach Spaces Bernhelm Booß-Bavnbek, Chaofeng Zhu, 2018-03-19 The authors consider a curve of Fredholm pairs of Lagrangian subspaces in a fixed Banach space with continuously varying weak symplectic structures Assuming vanishing index they obtain intrinsically a continuously varying splitting of the total Banach space into pairs of symplectic subspaces Using such decompositions the authors define the Maslov index of the curve by symplectic reduction to the classical finite dimensional case The authors prove the transitivity of repeated symplectic

reductions and obtain the invariance of the Maslov index under symplectic reduction while recovering all the standard properties of the Maslov index As an application the authors consider curves of elliptic operators which have varying principal symbol varying maximal domain and are not necessarily of Dirac type For this class of operator curves the authors derive a desuspension spectral flow formula for varying well posed boundary conditions on manifolds with boundary and obtain the splitting formula of the spectral flow on partitioned manifolds *Best Practices in Bibliometrics & Bibliometric Services* Juan Ignacio Gorraiz,Rafael Repiso,Nicola De Bellis,Gernot Deinzer,2022-01-06 **North Carolina beyond the Connected Age** Michael L.
