context of the subtle politics of the day to day Throughout the chapters the author highlights the often missing depictions of older people who enjoy and enact bold informed agency as part of their everyday lives Drawing upon secondary data from the Mass Observation Archive a social thesis of leisure and ageing emerges that challenges the individualism inherent in active ageing It is proposed that the idea of active ageing creates complex constraints to leisure as people strive to measure up to cultural expectations The stories in this book advocate for an appreciation and re evaluation of passive leisure in later life and the enjoyment and freedom it can bring The project is therefore useful to students and researchers of leisure studies gerontology and sociology of ageing
