Cancer, Radiation Therapy, and the Market Barbara Bridgman Perkins, 2017-08-16 Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology co-evolved with its device industry throughout the twentieth century. Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices, initiated companies to manufacture the devices competitively, and designed hospital and freestanding procedure units to utilize them. In the process, they incorporated market strategies into medical organization and practice. This provocative inquiry concludes that public health policy needs to re-evaluate market-driven high-tech medicine and build evidence-based health care systems. **Department of Defense Appropriations for Fiscal Year ...** United States.
