

What is Life?

Life? What is life? What is the meaning of life? Why are life is important? What is the purpose of life? These questions might never find the right or appropriate answers because those questions are so subjective. And now I always think that questions when I actually hear about life. Everyone has a different way of viewing the definition of life. For me, life means to live in the moment and no worry to predict about our future. Life is like a book everyday a new page, every month is a new chapter and everyday is a series. Remember that life is actually like a book with an innumerable number of pages. These pages actually signify or represent the memories which we live in our life and also the ones which we will be living in the future. Each page is actually like a new chapter and a new start of every refreshing beginning in life. Life can also be considered to be mysterious enough because every new page represents a new challenge or a new problem in life. It is our duty to solve them by applying our rational thinking and experience that we have gathered in the past. Actually, all of our lives are simply as a storybook, and therefore we must make every possible effort to make it a bestseller. Remember that when things go wrong, it doesn't mean that fortune will never favor us anymore. Life is actually full of ups and downs, and we need to acknowledge it or accept it as it comes to us.

It means to strive to be your best at what you do and give it your best effort. It means to cherish every second you have with your family, friends, or relatives. It means to make an impact on a persons life. Life is an experience for us to try everything. For us to do what we like, along with what we don't like. When were take time to experience many things, what happens is that we become more aware of what is going on in the world, and in the minds of people. It provides an opportunity to relate and connect to more people in the world. Life has a meaning. It has its own purpose. It is to fulfill your purpose in life and to accomplish your goals. Sometimes life is unfair, but you always have to stand up for yourself to accomplish your goals. Pandemic reminded me that life is important because of the pandemic I learned how important life is. When my mom became positive in COVID disease I became even more worried about my life and the lives of the people I love.

I don't expect our country to have a big problem because of having this kind of disease. It is a huge for each of us because until now we don't have a vaccine to prevent it. Because of this pandemic we could not go back to our normal lives. I know many of us doesn't have hope in life because of this disease it will be reason why losing of their loved ones. And now I realized that the saying "Life is too short so live to the fullest" and probably I actually agree on it. That life is only short so let's do the things that will have good memories in our lives. Only God knows what good plan he had for us. Let us trust him no matter what happens to us because he will do everything okay to make our life back to normal. In order to enjoy life and live it to the fullest, it is essential to look at the very next page of our life and see what life has in stock for us. Turning the next page simply means that we must sound optimistic in troublesome situations and handle them with care and dedication. So life is too short so don't let other people do what you ever you want. Enjoy every moment in your life, let be free like a dove that they do what they want to go and fly so high.

Porter, 2018-06-05 The untold story of how hereditary data in mental hospitals gave rise to the science of human heredity In the early 1800s a century before there was any concept of the gene physicians in insane asylums began to record causes of madness in their admission books Almost from the beginning they pointed to heredity as the most important of these causes As doctors and state officials steadily lost faith in the capacity of asylum care to stem the terrible increase of insanity they began emphasizing the need to curb the reproduction of the insane They became obsessed with identifying weak or tainted families and anticipating the outcomes of their marriages Genetics in the Madhouse is the untold story of how the collection and sorting of hereditary data in mental hospitals schools for feeble-minded children and prisons gave rise to a new science of human heredity In this compelling book Theodore Porter draws on untapped archival evidence from across Europe and North America to bring to light the hidden history behind modern genetics He looks at the institutional use of pedigree charts censuses of mental illness medical social surveys and other data techniques innovative quantitative practices that were worked out in the madhouse long before the manipulation of DNA became possible in the lab Porter argues that asylum doctors developed many of the ideologies and methods of what would come to be known as eugenics and deepens our appreciation of the moral issues at stake in data work conducted on the border of subjectivity and science A bold rethinking

of asylum work Genetics in the Madhouse shows how heredity was a human science as well as a medical and biological one
