Research Handbook on Classroom Observation Sean Kelly, 2025-03-12 This comprehensive Research Handbook offers cutting edge insights into classroom observation systems for teacher evaluation and professional development with an emphasis on both applied and discovery oriented inquiry *Seeing Science Through the Eyes of Canadian Teachers and Learners* Christine D. Tippett, **Education for All 2000-2015: Achievements and challenges** UNESCO, 2015-04-08 Literaturverz S 414 459 **Education in Cambodia** Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests
