Analytical Chemistry aims to ease the first contact of students pursuing different scientific and technical studies by providing them with a simple general overview of the discipline. The objective of this innovative textbook is to teach rather than to inform. Using keywords of modern Analytical Chemistry it constructs a teaching message accessible to the beginner with emphasis on relations between these keywords to ensure consistency in the teaching contents of the book. Practical exercises 450 questions for students and 27 interactive seminars are used as vehicles for expounding a large number of examples in order to clarify and consolidate the text and facilitate its comprehension.

Cognitive and Metacognitive Problem-Solving Strategies in Post-16 Physics
Ronald Mazorodze, Michael J. Reiss, 2019-09-20. This book reports on a study on physics problem solving in real classrooms situations. Problem solving plays a pivotal role in the physics curriculum at all levels. However, physics students' performance in problem solving all too often remains limited to basic routine problems with evidence of poor performance in solving problems that go beyond equation retrieval and substitution. Adopting an action research methodology, the study bridges the research-practical divide by explicitly teaching physics problem solving strategies through collaborative group problem solving sessions embedded within the curriculum. Data were collected using external assessments and video recordings of individual and collaborative group problem solving sessions by 16-18 year olds. The analysis revealed a positive shift in the students' problem solving patterns both at group and individual level. Students demonstrated a deliberate, well-planned deployment of the taught strategies. The marked positive shifts in collaborative competences, cognitive competences, metacognitive processing and increased self-efficacy are positively correlated with attainment in problem solving in physics.

However this shift proved to be due to different mechanisms triggered in the different students
