Synthesized WICS model **Resources in Education** ,1989 Research in Education ,1974 **Ethnobotany** Gary J. Martin,2014-07-29 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists Recently these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and as a consequence have used a much more ecological approach This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students I shall certainly recommend it to any future students who are interested in ethnoecology I particularly like the sympathetic approach to local peoples which pervades this book It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders **Cases on Assessment and Evaluation in Education** Khosrow-Pour, D.B.A., Mehdi,2012-08-31 With the demand to maintain a competitive advantage the assessment and evaluation of education is vital in measuring the knowledge and skills of the students community and educational system as a whole by providing educators with the facts needed to enhance and improve the learning process Cases on Assessment and Evaluation in Education presents a collection of case studies describing the methods used to assess an education course what factors to assess as well as which factors determine the success of these factors This casebook aims to bring together different research perspectives on the questions surrounding the issues of educational assessment and evaluation **Process Analytical Technology** Katherine A.
