 may be defined as a state of balance in our body mind and soul When this balance is disturbed so is our health However the
 balance in our health is fundamentally related to the balance in our society Imbalances in our societies particularly of a
 socioeconomic nature would naturally affect our inner balance and health Hence this book argues that imbalances in the
 distribution of socioeconomic resources have led to inequities in health both within and between nations It systematically
 explores the roots of inequalities in markets as the dominant distributive mechanisms in advanced capitalist economies to
 show their inherent biases against the poor and less powerful It also describes the various social protections that have been
 put in place in the post war era to protect the vulnerable among us and documents how such protections have been rolled
 back with the rise of neoliberalism especially after the recent financial crisis It calls for social medicine both in the sense of
 understanding health as the outcome of social conditions and as the necessity of a collective approach for addressing health
 inequities through a social polity as it contains the costs and sustains the healthcare systems **Sewall Wright and**
