

Sexual Reproduction

Sexual reproduction is the perpetuation of a new organism from two organism with the use gametes. In this process male gametes which is the sperm cell fuses with a female gamete known as the egg cell to form a diploid cell called zygote containing two sets of chromosomes. During sexual reproduction the genetic material contained in their chromosomes combine to produce genetically diverse offspring that is different from both parents. Humans, frogs, fish, cats and dogs all reproduce through the method of sexual reproduction.

Activity 4 Fill In

Directions. Complete the description of the illustration in the left column by choosing the terms in the grid. Write your answer in the spaces.
