

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

New Developments in Statistical Information Theory Based on Entropy and Divergence Measures
 Leandro Pardo, 2019-05-20 This book presents new and original research in Statistical Information Theory based on minimum divergence estimators and test statistics from a theoretical and applied point of view for different statistical problems with special emphasis on efficiency and robustness Divergence statistics based on maximum likelihood estimators as well as Wald's statistics likelihood ratio statistics and Rao's score statistics share several optimum asymptotic properties but are highly non robust in cases of model misspecification under the presence of outlying observations It is well known that a small deviation from the underlying assumptions on the model can have drastic effect on the performance of these classical tests Specifically this book presents a robust version of the classical Wald statistical test for testing simple and composite null hypotheses for general parametric models based on minimum divergence estimators
