or America's leisure class. It has become more ubiquitous and now practically everyone can experience luxury even luxury in architecture. Focusing on various contexts within Western Europe, Latin America, and the United States, this book traces the myths and application of luxury within architecture interiors and designed landscapes. Spanning from antiquity to the modern era, it sets out six historical categories of luxury: Sybaritic, Lucullan, architectural excess, rustic, neo-European, and modern, and relates these to the built and unbuilt environment, taking different cultural contexts and historical periods into consideration. It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits. The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another. Providing voluptuous settings for the nobles and the leisure class, luxury took the form of not only grand palaces but also follies, country and suburban houses, private or public entertainment venues, and ornate skyscrapers with fast lifts. The *Architecture of Luxury* proposes that in Western societies, the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture. *The Art of Building in Ancient and Modern Times, Or, Architecture Illustrated* Johann Georg Heck, 1856

The Architecture of Influence Amanda Reeser Lawrence, 2023-11-21. How do we create the new from the old? The *Architecture of Influence* explores this fundamental question by analyzing a broad swath of twentieth-century architectural works, including some of the best-known examples of the architectural canon, modern and postmodern, through the lens of influence. The book serves as both a critique of the discipline's long-standing focus on genius and a celebration of the creative act of revisioning and reimagining the past. It argues that all works of architecture not only depend on the past but necessarily alter, rewrite, and reposition the traditions and ideas to which they refer. Organized into seven chapters: Replicas, Copies, Compilations, Generalizations, Revivals, Emulations, and Self-Repetitions, the book redefines influence as an active process through which the past is defined, recalled, and subsequently redefined within twentieth-century architecture.
